# Topik Material dan Batasannya

## Material Topics and Its Limits

Materialitas topik merupakan prinsip yang menentukan topik-topik relevan mana yang cukup penting untuk dilaporkan sebuah lembaga. Tidak semua topik material diartikan sebagai topik yang penting untuk dilaporkan, namun Laporan Keberlanjutan mencerminkan secara relatif prioritas pelaporan dan materialitas suatu topik. Materialitas topik dinilai berdasarkan dua dimensi, yaitu: dampak ekonomi, lingkungan dan sosial yang signifikan bagi organisasi; dan pengaruh penting terhadap penilaian dan pengambilan keputusan pemangku kepentingan.

Laporan ini menyajikan topik material yang berguna untuk keberlanjutan PermataBank, yaitu informasi tentang komitmen, kebijakan, pelaksanaan dan kinerja keberlanjutan. Topik material ditentukan melalui analisis isu yang berkaitan dengan keberlanjutan usaha perbankan di Indonesia, terutama yang berkaitan dengan aspek non-finansial. Penerapan keuangan berkelanjutan sebagai amanat dari POJK 51/2017 menjadi salah satu topik material yang dilaporkan, selain mencermati keinginan pemangku kepentingan terkait dengan eksplorasi topik material lainnya.

Setelah topik material teridentifikasi, PermataBank melakukan penilaian berdasarkan dua dimensi pendekatan seperti disebutkan di paragraf sebelumnya. Hasil penilaian disajikan dalam bentuk tabel serta diagram berikut, dan topik-topik material yang dipilih adalah yang memiliki derajat 'sedang sampai dengan tinggi', sesuai dengan dua dimensi penilaian materialitas topik.

**[GRI 102-46]**

Topic materiality is the principle that determines which relevant topics are significant enough to be reported by an institution. Not all material topics are characterized as important topics to be reported; however, this Sustainability Report reflects the reporting priority and materiality of the topics. Topic materiality is assessed based on two dimensions, namely: significant economic, environmental, and social impacts on the organization; and its material influence on the assessment and decision making of the stakeholders.

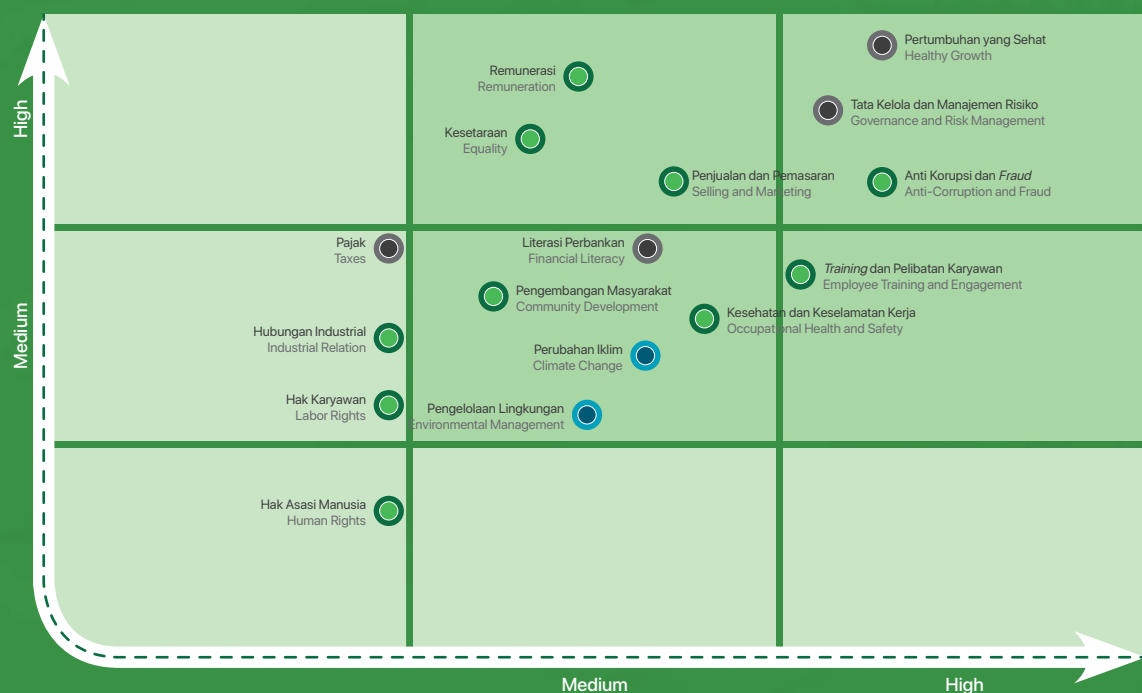

This report presents material topics that are beneficial for the sustainability of PermataBank, namely information on sustainability commitment, policy, and performance. Material topics are determined by analyzing matters that are related to the sustainability of the banking business in Indonesia, particularly concerning non-financial aspects. Implementation of sustainable finance as a mandate of POJK 51/2017 was one of the material topics reported, in addition to observing the expectations of stakeholders in exploring other material topics.

After the material topics have been identified, PermataBank conducted an assessment based on the two-dimensional approach as stated in the previous paragraph. The assessment results are presented in the following tables and diagrams, and the material topics selected were topics rated 'medium to high', in accordance with the two-dimensional materiality assessment.

Melalui program ini pula, sebanyak 120 penyandang disabilitas peserta program pelatihan vokasi di BBRVPD Cibinong mendapatkan modul program berupa literasi keuangan dan perbankan, kewirausahaan, dan pengembangan diri.

## Performance Achievement of Sustainable Finance

PermataBank sustainability values are set out in the strategy to adopt the principles of sustainable finance through three main areas, which are economic, social, and environmental. In the economic field, PermataBank is increasing its sustainable financial product portfolio by increasing the Microfinance (KUR) portfolio and developing channeling cooperation with microfinance institutions.

In terms of digital transformation, PermataBank continues to develop account opening and banking transaction services, such as unsecured lending, including credit cards and unsecured loans (KTA) through mobile banking, as well as increasing banking transactions through e-channels, such as eMutual Funds and eBonds. The availability of digital financial services allows for financial products and services to be enjoyed by the wider community as well and provide convenience in banking transactions.

PermataBank juga kembali menggelar “CERITA Permata” (Cinta dan Empati daRI kiTA) serempak di 50 kota dan melibatkan kurang lebih 3.000 *Employee Volunteers*. Kegiatan ini sejalan dengan misi untuk mewujudkan akses dan literasi keuangan yang lebih luas bagi semua golongan masyarakat. Kami juga mengadakan program PermataYouthPreneur (PYP) yang merupakan sebuah program pelatihan *start-up* inspiratif dengan kurikulum komprehensif di bidang kewirausahaan bagi para pelajar Sekolah Menengah Kejuruan (SMK) dengan jurusan Rekayasa Perangkat Lunak (RPL) selama dua bulan pembelajaran. Pada tahun 2019 ini, PYP diikuti sebanyak 130 pelajar dengan tema “Inovasi *Financial Technology* Menuju Industri 4.0”.

Di bidang lingkungan, PermataBank secara konsisten melakukan pengelolaan dampak-dampak lingkungan kegiatan usaha bank yang meliputi pengurangan emisi Gas Rumah Kaca, energi, dan pemakaian air di seluruh kantor bank. Inisiatif konversi *statement* dalam bentuk kertas menjadi *e-statement* dan penggunaan SMS dan surat elektronik sebagai media komunikasi, merupakan bagian dari upaya untuk mengurangi jejak lingkungan pada layanan keuangan kepada nasabah.

## Tantangan Penerapan Keuangan Berkelanjutan

Tantangan yang dihadapi dalam hal pelaksanaan program RAKB terkait dengan portofolio kredit adalah peningkatan penyaluran kredit dan upaya untuk memperbaiki kualitas kredit dengan mempertahankan tingkat *Non-Performing Loan* (NPL) tidak lebih dari 5% terhadap portofolio fasilitas kredit. Hal yang dilakukan PermataBank dalam mengatasi tantangan tersebut dengan menerapkan strategi bisnis yang bertujuan untuk meningkatkan pendapatan, menekan biaya, dan pengendalian risiko untuk mencegah kerugian.

Tantangan eksternal yang dihadapi adalah kondisi perekonomian global dan nasional serta kebijakan makro yang dapat mempengaruhi keberlanjutan PermataBank. Kami juga mencermati kompetisi dari perusahaan *fintech* yang dapat menyalurkan pembiayaan kepada masyarakat, sehingga masyarakat semakin banyak memiliki pilihan untuk melakukan transaksi keuangan. Faktor sosial eksternal lainnya yang dapat memengaruhi PermataBank termasuk isu ketenagakerjaan seperti ketentuan upah minimum yang memengaruhi pengambilan keputusan di dunia usaha.

PermataBank also held the “CERITA Permata (Love and Empathy from Us) simultaneously in 50 cities and involving approximately 3,000 Employee Volunteers, an activity in line with the mission to expand financial access and literacy for all members of the community. We also organized the PermataYouthPreneur (PYP) program, which is an inspiring start-up training program with a comprehensive curriculum in the entrepreneurship for Vocational High School students majoring in Software Engineering for two months of learning. During 2019, PYP was attended by 130 students with the theme “Financial Technology Innovation Towards Industry 4.0”.

In the environmental field, PermataBank consistently manages the environmental impacts of its business activities, which include reducing Greenhouse Gas emissions, energy, and water usage in all bank offices. The initiative to convert paper-based statements to e-statements and the use of SMS and electronic mail as communication media, is part of the effort to reduce the environmental footprint in financial services to the customers.

## Challenges in Sustainable Finance Implementation

The challenges in the implementation of the RAKB program related to loan portfolio are increasing loan disbursements and the efforts to improve credit quality while maintaining the Non-Performing Loan (NPL) level under 5% of the loan facility portfolio. What PermataBank has done to address these challenges is to implement a business strategy to increase revenues, reduce costs, and control risks in order to prevent losses.

External challenges include the global and national economic conditions and those macro policies that may affect the sustainability of PermataBank. We also pay close attention to competition from fintech companies that can channel financing to the public, enabling the public to have more options to conduct financial transactions. Other external social factors that can influence PermataBank include employment issues, such as minimum wage, which influences decision-making across the business world.

## Pengantar dari Direktur Utama

### President Director's Introduction

Di bidang lingkungan, Indonesia menghadapi tantangan terutama bencana alam karena letak geografis Indonesia yang berada di cincin api maupun tantangan perubahan iklim. Terjadinya kerusakan alam karena bencana alam maupun perubahan iklim dapat menimbulkan risiko bagi bisnis dan biaya yang tidak sedikit yang perlu selalu dicermati. Di sisi lain, keunggulan sumber daya alam manusia merupakan peluang sekaligus tantangan karena pengelolaan sumber daya alam harus dilakukan secara berkelanjutan dan adil.

### Strategi Pencapaian Target

Dalam penerapan keuangan berkelanjutan, PermataBank menerapkan strategi untuk mencapai target yang telah ditetapkan dalam RAKB, yaitu:

- Mengembangkan kerja sama dengan lembaga keuangan mikro untuk menyediakan pembiayaan berupa Kredit Usaha Rakyat (KUR) sehingga memungkinkan masyarakat yang selama ini memiliki keterbatasan akses dapat memperoleh produk pembiayaan formal dari perbankan.
- Menerapkan integrasi aspek Lingkungan, Sosial dan Tata Kelola (LST) pada pembiayaan korporasi yang berpotensi memiliki dampak terhadap lingkungan. Integrasi ini kami wujudkan dalam kebijakan pembiayaan korporasi yang harus memenuhi persyaratan *Environment and Social Requirement Assessment* (ESRA) untuk industri tertentu.
- Pengembangan perbankan digital untuk memperluas akses dan layanan keuangan, meminimalkan jejak lingkungan operasional perbankan secara berkelanjutan, dan mampu memberikan layanan yang lebih sederhana, cepat dan handal (*simple, fast and reliable*).

In the environmental field, Indonesia faces challenges, particularly natural disasters due to the geographical location of Indonesia that is in the ring of fire as well as the challenges of climate change. The occurrence of natural damages due to climate change may pose risks to business with significant cost that need to be closely observed at all times. On the other hand, superiority in terms of human resources is an opportunity as well as a challenge because the management of natural resources must be carried out in a sustainable and fair manner.

### Target Achievement Strategy

In the implementation of sustainable finance, PermataBank applies the strategy to accomplish the targets that have been established in the RAKB, namely:

- Develop cooperation with microfinance institutions to provide financing in the form of Microfinance (KUR), enabling communities, with previously limited access, to obtain formal financial products from banks.
- Implementing the integration of the Environmental, Social, and Governance (ESG) aspects on corporate financing with potential impacts to the environment. We realize this integration in the form of corporate loan policy that must meet the Environment and Social Requirement Assessment (ESRA) for certain industries.
- Development of digital banking to expand financial access and services, minimize the environmental footprint of banking operations in a sustainable manner, and be able to provide simple, fast, and reliable services.

### PermataBank dan Tujuan Pembangunan Berkelanjutan

Tujuan Pembangunan Berkelanjutan (TPB)/(Sustainable Development Goals/SDGs) yang telah dicanangkan oleh PBB dan dituangkan dalam Kesepakatan Paris (Paris Agreement on Climate Changes/PACC) pada tahun 2015 telah menjadi salah satu agenda besar pemerintahan Indonesia. Untuk mencapai tujuan tersebut tidak hanya diperlukan partisipasi dari Pemerintah, namun juga dari masyarakat dan pihak swasta. Perbankan dalam hal ini merupakan salah satu partisipan dari sektor swasta yang secara tidak langsung terlibat dalam pencapaian TPB dan PACC melalui produk dan jasa keuangannya.

Peran penting PermataBank dalam pencapaian TPB adalah dengan menjadi *Agent of Development* melalui penyaluran kredit untuk kegiatan produktif dan menyediakan pembiayaan yang dibutuhkan untuk pembangunan infrastruktur oleh Pemerintah. Tersedianya kredit dan infrastruktur yang memadai memungkinkan pertumbuhan ekonomi dan membuka peluang peningkatan kesejahteraan masyarakat. PermataBank juga terlibat langsung dalam upaya pencapaian TPB melalui kegiatan sosial yang diusung di bawah bendera PermataHati dan upaya pengurangan emisi Gas Rumah Kaca yang ditimbulkan dari operasional PermataBank.

Terdapat 17 Tujuan Pembangunan Berkelanjutan yang ingin dicapai umat manusia pada tahun 2030 dengan prioritas utama adalah mengakhiri kemiskinan, melestarikan lingkungan, dan memberikan kesempatan kepada semua orang untuk meningkatkan kesejahteraan. Melalui produk dan jasa keuangan, diharapkan PermataBank berkontribusi pada TPB-8: Pekerjaan Layak dan Perkembangan Ekonomi; TPB-9: Industri, Inovasi dan Infrastruktur. Sedangkan melalui kegiatan CSR serta operasional PermataBank, kami berkontribusi pada TPB-4: Pendidikan Berkualitas; TPB-5: Kesenjangan Gender; TPB-10: Berkurangnya Kesenjangan; dan TPB-13: Penanganan Perubahan Iklim.

### Social Responsibility Activities related to Community Empowerment

PermataBank supports financial literacy activities through CERITA Permata (Love and Empathy from Us), which are carried out in 50 cities and supported by almost 1,000 PermataBankers participating in Employee Volunteers. Financial literacy activities also reached special schools in Indonesia.

### PermataBank and Sustainable Development Goals

Sustainable Development Goals (SDGs) that have been initiated by the United Nations and outlined in the Paris Agreement on Climate Changes (PACC) in 2005 have become of the major agendas of the government of Indonesia. To achieve this goal, participation is not only required from the Government, but also from the public and the private sector. In this case, banking is one of the participants from the private sector that is indirectly involved in the achievement of the SDGs and PACC through its financial products and services.

The significant role of PermataBank in the accomplishment of the SDGs is by becoming an Agent of Development through lending for productive activities and providing the financing required for infrastructure development by the Government. The availability of adequate loan and infrastructure allows economic growth and opens opportunities for community welfare improvement. PermataBank is also directly involved in the efforts to accomplish the SDGs through social activities under PermataHati as well as efforts to reduce Greenhouse Gas arising from PermataBank operational activities.

There are 17 Sustainable Development Goals that humanity aims to accomplish in 2030 with the main priorities to put an end to poverty, preserve the environment, and provide opportunities for all to improve welfare. Through financial products and services, PermataBank is expected to contribute to SDG-8: Adequate Work and Economic Growth; SDG-9: Industry, Innovation, and Infrastructure. While through CSR and operational activities of PermataBank, we contributed to SDG-4: Quality Education; SDG-5: Gender Equality; SDG-10: Reduce Inequality; and SDG-13: Handling of Climate Change.

Berikut ini adalah enam SDGs yang kami yakini memberikan dampak yang signifikan dari kegiatan yang dilakukan PermataBank.

The following are the six SDGs that we believe have significant impact from activities undertaken by PermataBank.

## PERMATABANK DAN TUJUAN PEMBANGUNAN BERKELANJUTAN

Tujuan Pembangunan Berkelanjutan (TPB)/(Sustainable Development Goals/SDGs) yang telah dicanangkan oleh PBB dan Kesepakatan Paris (Paris Agreement on Climate Changes/ PACC) pada tahun 2015 telah menjadi agenda besar Pemerintah Indonesia. Untuk mencapai tujuan tersebut diperlukan partisipasi pemerintah, masyarakat, dan swasta. Perbankan dalam hal ini merupakan salah satu aktor dari sektor swasta yang secara tidak langsung terlibat dalam pencapaian TPB dan PACC melalui produk dan jasa keuangannya.

## PERMATABANK AND SUSTAINABLE DEVELOPMENT GOALS

The objective of Sustainable Development Goals (SDGs) that have been initiated by the United Nations and the Paris Agreement on Climate Changes (PACC) in 2015 have become a major agenda of the Government of Indonesia. To achieve these objectives, participation of the government, community, and private sector are required. In this case, banking is one of the actors from the private sector that is indirectly involved in the accomplishment of SDGs and PACC through its financial products and services.

## Program PermataHati

### PermataHati Programs

*PermataYouthPreneur* (PYP) merupakan program pelatihan startup inspiratif dengan kurikulum komprehensif di bidang kewirausahaan meliputi literasi keuangan, bisnis model, startup digital, dan *coding* yang ditujukan bagi para pelajar tingkat Sekolah Menengah Kejuruan (SMK) dengan jurusan Rekayasa Perangkat Lunak selama dua bulan pembelajaran.

Tema PYP pada tahun ini adalah “Inovasi *Financial Technology* Menuju Industri 4.0”. Tema ini berangkat dari riset McKinsey (2019) yang menyebutkan tiga tantangan fundamental digital ekonomi di Indonesia yang perlu dihadapi, yaitu: (i) kebutuhan tenaga dan bakat di area digital, (ii) kebutuhan startup yang mampu mengisi kebutuhan domestik hingga peluang ekspor, dan (iii) kebutuhan sarana pengukuran data digital.

PYP 2019 terbuka bagi pelajar dari seluruh Indonesia, dimana dari 200 lebih pendaftar *online*, terpilih 130 pelajar SMK dengan ide *startup fintech* terbaik dari area Jabodetabek, Jawa Barat, Jawa Timur, Jawa Tengah, dan Gorontalo. Dikarenakan pendaftar terbanyak berasal dari Jawa Timur, *PermataYouthPreneur* tahun ini juga dilaksanakan di Malang sebagai kota induk kedua selain Jakarta. Dari 130 peserta, dipilih 30 peserta yang berangkat ke Jakarta untuk memperoleh *workshop* lanjutan serta kunjungan ke startup dengan tujuan mendapatkan gambaran lebih lanjut mengenai dunia kerja digital dan *fintech*. Program ini dijalankan secara inklusif dengan keikutsertaan siswa vokasional tuna netra dalam rangkaian program. Mereka menjadi 3 dari 30 finalis yang bersaing memperoleh hadiah beasiswa bekerja sama Direktorat Pembinaan SMK Kementerian Pendidikan dan Kebudayaan (Kemendikbud).

PermataBank bekerja sama dengan Arkademy dan didukung oleh Kemendikbud serta OJK, mengemas program PYP dalam rangkaian diskusi dan pelatihan, modul kurikulum *online* serta mentoring, agar peserta mampu mengembangkan ide produk *fintech*-nya masing-masing. Peserta berkesempatan mengikuti sesi inspiratif dengan salah satu *unicorn* dan *fintech* unggulan Indonesia yaitu Bukalapak dan Amartha, serta mengikuti berbagai modul *online* dan *offline* bersama para mentor. Di akhir program, mereka berkompetisi dengan mempresentasikan hasil *prototype* produk *fintech* kepada para juri atau ‘calon investor’ layaknya sebuah *startup* asli.

*PermataYouthPreneur* (PYP) is an inspirational startup mentorship program with a comprehensive curriculum in the field of entrepreneurship covering financial literacy, business models, digital startups, and coding, aimed at Vocational School (SMK) students majoring in Software Engineering for two months of learning.

The theme for PYP this year was “Financial Technology Innovation Towards Industry 4.0”. This theme departs from the McKinsey research (2019) that stated three fundamental digital economic challenges in Indonesia that need to be addressed, namely: (i) extraordinary talent shortages in the digital arena, (ii) a shortfall of startups that could capture domestic consumption and export opportunities, and (iii) insufficient means of tracking the impact of digitization.

The 2019 PYP is open for students from all over Indonesia, in which 130 Vocational School (SMK) students with the best fintech startup ideas from the Greater Jakarta area, West Java, East Java, Central Java, and Gorontalo were selected out of 200 online registrants. Because most of the registrants originated from East Java, this year’s *PermataYouthPreneur* was also held in Malang as the second main city apart from Jakarta. Out of the 130 participants, 30 were selected to depart for Jakarta to obtain in-depth workshops as well as startup company visits to gain a further knowledge of the digital and fintech world. This program is implemented inclusively, with the participation of visually impaired vocational students in the series of program. They became 3 out of 30 finalists who competed for a scholarship grand prize in collaboration with the Directorate of Vocational Education Assistance of the Ministry of Education and Cultural Affairs.

PermataBank collaborates with Arkademy and is supported by the Ministry of Education and Cultural Affairs and OJK, to formulate the PYP program in a series of discussions and training, online curriculum modules and mentoring, enabling the participants to be able to develop their fintech product ideas. Participants had the opportunity to attend inspirational sessions with one of Indonesia’s leading unicorns and fintech, Bukalapak and Amartha, as well as participating in various online and offline modules with mentors. At the end of the program, they compete by presenting a fintech product prototype to the judges or ‘potential investors’ like a true startup.

## PermataBank and Development

Industri jasa keuangan memegang peran yang signifikan dalam menunjang pertumbuhan ekonomi dan menciptakan pemerataan. Selain belanja pemerintah, untuk mencapai target pertumbuhan ekonomi diperlukan pendanaan untuk meningkatkan kegiatan usaha dan konsumsi, yang dicapai melalui fungsi intermediasi bank dalam menyerap dana masyarakat dan menyalurkan kredit.

Untuk mencapai target pertumbuhan ekonomi dibutuhkan ketersediaan kredit dan pembiayaan yang memadai. Kredit dimanfaatkan ke dalam usaha-usaha produktif untuk berbagai sektor ekonomi seperti pertanian, pertambangan, perindustrian, transportasi, perdagangan dan jasa-jasa lainnya yang bertujuan meningkatkan pendapatan nasional dan pendapatan masyarakat. Pemerataan pendapatan juga dimungkinkan sejalan dengan terbukanya peluang akses permodalan yang lebih besar dan keterlibatan masyarakat dalam kegiatan ekonomi.

Khusus bagi Indonesia, pemerataan ekonomi juga harus mencapai seluruh lapisan masyarakat. Oleh karena itu Pemerintah mewajibkan agar bank mendukung pertumbuhan ekonomi yang berkelanjutan dan inklusif melalui penyediaan produk dan layanan keuangan bagi masyarakat di sektor ekonomi informal dan berada di piramida terbawah.

Seiring dengan itu, sebagai *Agent of Trust*, bank dituntut untuk menjalankan fungsi dan peranannya sesuai dengan peraturan, menjalankan kegiatan bank yang memenuhi asas kehati-hatian dan syarat kesehatan bank sehingga mampu menjamin kepercayaan nasabah yang merupakan subyek terpenting bagi bank. **[GRI 103-1]**

The financial services industry plays a crucial role in supporting economic growth and creating equitable distribution. In addition to government spending, funding to increase business activities and consumption is required to meet economic growth targets, achievable through the intermediary function of banks in absorbing public funds and channeling loans.

To achieve economic growth targets, the availability of adequate credit and financing is required. Credit is utilized by productive business ventures in various economic sectors, such as agriculture, mining, industry, transportation, trade, and other services that will increase the national income as well as the community welfare. In addition, equitable income distribution is made possible in line with the opening of opportunities for greater access of capital and community involvement in economic activities.

For Indonesia, economic equality must reach all levels of the society. Therefore, the Government requires banks to support sustainable and inclusive economic growth through the provision of financial products and services for people in the informal economic sectors and people at the bottom of the economic pyramid.

In line with that, as an *Agent of Trust*, banks are required to perform their functions and roles in accordance with regulations, conduct bank activities that meet the prudence principle, and soundness requirements, ultimately securing the confidence of customers, who are the most important subjects for banks. **[GRI 103-1]**

### ENERGI DAN TANTANGAN IKLIM

Emisi Gas Rumah Kaca (GRK) dari kegiatan operasional perbankan terutama berasal dari emisi tidak langsung yang timbul dari penggunaan energi. Oleh karenanya PermataBank secara konsisten melakukan upaya untuk mengurangi GRK dengan efisiensi energi dan pengurangan pemakaian energi.

PermataBank telah menggunakan peralatan perkantoran yang pemakaian energinya lebih efisien seperti penerangan dan pendingin udara. Efisiensi energi juga diperoleh dengan pengaturan suhu pendingin ruangan dan pengaturan persetujuan lembur di kantor-kantor PermataBank.

#### Pemakaian Listrik (GJoule)

Electricity Consumption (GJoule)

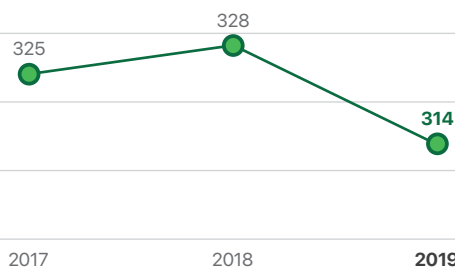

### ENERGY AND CLIMATE CHALLENGES

Greenhouse Gas (GHG) emission from banking activities is mainly derived from indirect emissions from energy use. Accordingly, PermataBank consistently strives to reduce GHG through improved energy efficiency and reducing energy consumption.

PermataBank is using office equipment that is designed with more efficient energy use such as lighting and air conditioning. Energy efficiency is also obtained by regulating the temperature of the air conditioner and overtime arrangements at PermataBank offices.

## PENGHEMATAN AIR

Air dipergunakan terutama untuk keperluan domestik seperti toilet dan lain-lain. Sumber air berasal dari perusahaan air bersih dan air tanah untuk kantor-kantor di daerah yang tidak terdapat pemasok air bersih. Penggunaan air tanah yang ekstensif di kota-kota besar merupakan penyebab penurunan permukaan tanah dan intrusi air laut, oleh karenanya PermataBank mengelola pemakaian air, terutama yang berasal dari air tanah.

PermataBank melakukan kontrol yang ketat untuk memastikan tidak ada air yang terbuang karena kebocoran dan upaya untuk mengurangi pemborosan air seperti penggunaan ember untuk mencuci kendaraan, pengurangan tekanan air, dan gerakan satu kali *flush*.

## LESS PAPER OFFICE

PermataBank mengurangi intensitas pemakaian kertas melalui dua pendekatan, pendekatan pertama adalah mengurangi penggunaan kertas untuk proses internal PermataBank dengan komunikasi elektronik. Selanjutnya, pendekatan kedua melalui penyediaan layanan digital bagi nasabah menggantikan solusi kertas pada transaksi perbankan.

Inovasi digital untuk meningkatkan layanan yang sekaligus juga mengurangi dampak lingkungan, di antaranya:

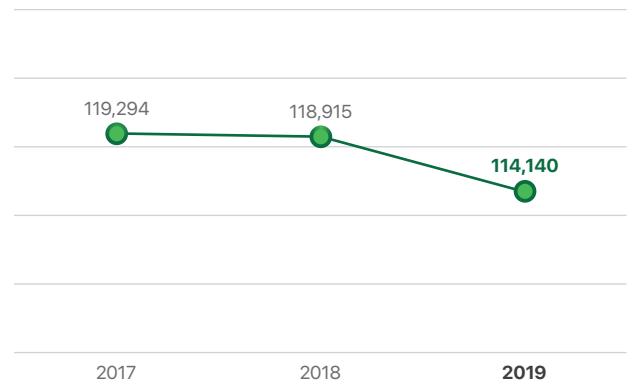

- PermataMobile X.
- Layanan Permata e-Business (PeB), *host to host web service*, dan Permata e-Value Chain (PeVC).

## WATER SAVING

Water is mainly used for domestic needs, such as toilet use and others. Water is sourced from a clean water company and groundwater for offices in area with no clean water supplier. Extensive use of ground water in large cities is the cause of land subsidence and seawater intrusion, therefore, PermataBank pays close attention to the management of water usage, especially groundwater.

PermataBank carries out strict controls to ensure there is no water wasted due to leaks and efforts to reduce waste, such as the use of buckets to wash vehicles, reduce water pressure, and the one-flush movement.

## LESS PAPER OFFICE

PermataBank is reducing the intensity of paper usage using two approaches: first approach is reducing the use of paper in PermataBank's internal operations by using electronic communication. In addition, second approach is through digital services for customers which replace paper usage in banking transactions.

Digital innovations designed to improve our services, which also reduce environmental impacts were, among others:

- PermataMobile X.
- Permata e-Business (PeB) service, *host to host web service*, and Permata e-Value Chain (PeVC).

## SKEMA GEDUNG RAMAH LINGKUNGAN

Sejak 2009, PermataBank menerapkan sistem peringkat bagi gedung-gedung kantor PermataBank yaitu *Building Environmental Assessment Standard* (BEAS) yang ditetapkan oleh Standard Chartered Bank sebagaimana telah diterapkan di 30 negara. BEAS mengukur dampak operasional dari gedung-gedung GEMS PermataBank. Termasuk dalam kriteria BEAS adalah pengelolaan emisi GRK, konsumsi listrik dan konsumsi air.

Selain itu, sesuai dengan peraturan izin lingkungan di Indonesia, PermataBank memastikan dilakukannya laporan pengelolaan dan pemantauan lingkungan pada gedung-gedung yang dimiliki dan dikelola oleh PermataBank. Hal ini untuk memastikan dampak lingkungan kegiatan PermataBank terhadap lingkungan sesuai dengan persyaratan peraturan perundangan.

## ENVIRONMENTALLY FRIENDLY BUILDING SCHEME

Since 2009, PermataBank has implemented a rating system for PermataBank office buildings, which is the Building Environmental Assessment Standard (BEAS). This was established by Standard Chartered Bank and has been implemented in 30 countries. BEAS measures the operational impact of PermataBank's GEMS buildings. Included in the BEAS criteria are the management of GHG emissions, electricity consumption and water consumption.

Additionally, in accordance with environmental permit regulations in Indonesia, PermataBank ensures that environmental management and monitoring reports are carried out on buildings owned and managed by PermataBank. This is conducted to ensure that the environmental impact of PermataBank's activities on the environment is in accordance with regulatory requirements.

### Digital Services for All

In line with the increasing demands of customers for simple, fast, and reliable services, PermataBank launched a series of financial product and service innovations for its customers. PermataBank launched digital banking to provide convenience in conducting banking transactions and account openings, including communicating with customers through electronic channels.

Digitizing financial services enables financial inclusion because it facilitates access to the various financial systems, products, and services.

Salah satu layanan digital yang dikembangkan oleh PermataBank adalah PermataMobile X yang merupakan aplikasi *mobile banking* terbaru dengan 200 fitur lebih seperti: *single customer view*, *account opening*, *wealth management transaction*, histori transaksi selama 12 bulan, dan beragam fitur lainnya.

Inovasi digital yang dilakukan PermataBank untuk memberikan solusi finansial terbaik bagi nasabah berbuah penghargaan sebagai salah satu penyedia layanan retail terbaik. Penghargaan kali ini diberikan oleh The Asian Banker sebagai "The Best Frictionless Internet Banking Initiative, Application or Programme" untuk layanan API dengan Indo Premier Sekuritas.

Pada tahun 2019 PermataBank meluncurkan *new model branch* yang dirancang untuk memberikan pengalaman terbaik bagi nasabah. *New model branch* PermataBank didesain sedemikian rupa agar nasabah yang datang dapat dilayani oleh PermataBankers namun setiap transaksi dengan konsep *paperless* dan semua aktivitas dapat dilaksanakan secara digital, sehingga PermataBankers dapat lebih fokus membantu nasabah dalam hal konsultasi dan transaksi yang sifatnya kompleks.

## Dampak Positif dan Negatif produk Keuangan Berkelanjutan

Produk dan layanan keuangan berkelanjutan memiliki dampak positif bagi masyarakat karena dapat membantu segmen masyarakat tertentu di sektor ekonomi informal dan piramida terbawah (keuangan inklusif) dengan akses permodalan serta penyediaan kredit UKM yang berfokus bagi usaha yang berkaitan dengan sektor *retail*, *trading*, *processing*, dan *services*. Layanan keuangan yang inklusif memungkinkan akses permodalan dan layanan keuangan formal yang selanjutnya dapat berkontribusi pada upaya mewujudkan pemerataan pendapatan sekaligus pengentasan kemiskinan.

Dampak positif dari pengembangan perbankan digital, selain memberikan kemudahan bagi nasabah juga bertujuan pada perbankan yang ramah lingkungan. Di sisi lain, dampak negatif dari pengembangan perbankan digital tersebut adalah risiko keamanan bertransaksi serta risiko kebocoran data privasi. Untuk mengatasi risiko tersebut, PermataBank membangun dan meningkatkan kapasitas infrastruktur teknologi informasi yang sejalan dengan kebutuhan dan pertumbuhan bisnis serta untuk meningkatkan keamanan dalam bertransaksi.

One of the digital services developed by PermataBank is PermataMobile X which is the latest mobile banking application with , more than 200 features, such as: single customer view, account opening, wealth management transaction, transaction history for 12 months, and a variety of other features.

Digital innovations undertaken by PermataBank to provide the best financial solutions for customers resulted in the award as one of the best retail services providers. The award was delivered by The Asia Banker as "The Best Frictionless Internet Banking Initiative, Application or Programme" for the API service in collaboration with Indo Premier Sekuritas.

In 2019, PermataBank launched a new model branch that was designed to provide the best experience to its customers. PermataBank's new model branch was designed so that incoming customers can be served by PermataBankers, but all activities are conducted with a paperless concept and all activities can be carried out digitally, allowing PermataBankers to focus more on assisting customers in terms of consultations and complex transactions.

## Positive and Negative Impacts of Sustainable Finance products

Sustainable finance products and services have positive impacts on society because they can assist certain segments of the community in the informal sectors and in the lowest tier of the pyramid (financial inclusion) with access to capital as well as the distribution of SME loans that focus on businesses related to the retail, trading, processing, and service sectors. Inclusive financial services allow access to capital and formal financial services that can contribute to the efforts for realizing equal distribution of income as well as alleviating poverty.

The positive impact of digital banking development includes facilitating customers as well as aiming at environmentally friendly banking. On the other hand, the negative impacts of digital banking development include security risks as well as higher risk of private data leaks. To address these risks, PermataBank develops and enhances the capacity of its information technology infrastructure, in line with the needs and business growth, as well as increasing security in conducting transactions.

PermataBank uses the control framework as a clear and straightforward guideline on the limits of risk taking. There are three key components in the risk control framework, which collectively provide the mechanisms for regulating and adjusting the limits in risk taking, which are policies, exposure limits, and delegated risk authorities framework.

## RISK IDENTIFICATION, ASSESSMENT, AND MONITORING

PermataBank anticipates and identifies risks in transactions, portfolios, infrastructure, and processes. If possible, these risks can be quantified and assessed against objective and consistent performance. For material risks, PermataBank conducts monitoring and reporting to inform risk-return trade-offs as well as ensuring that its transactions and portfolios remain within the allocated risk limits.

## INTERNAL CONTROL SYSTEM

As part of the internal control system, PermataBank conducts internal audit as an assurance mechanism that is independent from the effectiveness of the risk control processes in business activities (first line) and processes managed by the risk control officers (second line), which will illustrate the overall control system that has been running as required by the Risk Management Framework. **[GRI-102-11]**

More detailed information on the implementation of risk management can be viewed in the 2019 Annual Report of PermataBank in the Risk Management section on page 308.
