Untuk Laporan Keberlanjutan tahun 2024, Bank melakukan hal yang berbeda dibandingkan tahun-tahun sebelumnya, di mana Bank menggunakan pendekatan materialitas ganda yaitu melakukan kajian berbagai topik material berdasarkan dampak yang material kepada pemangku kepentingan, serta dampak keuangan yang material bagi operasional Bank.

For the 2024 Sustainability Report, the Bank is doing something different compared to previous years, where the Bank uses a dual materiality approach, namely conducting a study of various material topics based on the material impacts on stakeholders, as well as the material financial impact on the Bank's operations.

Proses kajian terdiri dari beberapa langkah, yaitu:

1. *Defin* :
  - a. Menentukan tujuan dari pengukuran materialitas ganda.
  - b. Menentukan target pemangku kepentingan yang akan menjadi kontributor/responden terhadap pengukuran materialitas ganda.
  - c. Menentukan metode pengumpulan data/informasi dari pemangku kepentingan, seperti survei (kuantitatif) dan *direct interview* (kualitatif).
  - d. Menentukan metode penilaian kuantitatif dari masing-masing topik material, seperti *pairwise comparison*, untuk setiap dimensi materialitas.
2. *Initial reviews and brainstorm*:
  - a. Melakukan *review* terhadap topik-topik material pada tahun sebelumnya, serta topik-topik material yang digunakan oleh S&P CSA dalam menilai BAS (*sustainability rating*) terkait penerapan keberlanjutan.

The study process consists of several steps, namely:

1. Define:
  - a. Define the purpose of dual materiality measurement.
  - b. Define targeted stakeholders who will be the contributors/respondents to the dual materiality measurement.
  - c. Define the method of data/information collection from stakeholders, such as surveys (quantitative) and direct interviews (qualitative).
  - d. Define the quantitative assessment method for each material topic, such as pairwise comparison, for each materiality dimension.
2. Initial reviews and brainstorming:
  - a. Review the material topics of the previous year, and the material topics used by S&P CSA in assessing BAS (sustainability rating) related to the implementation of sustainability.

- b. Melakukan penyesuaian terhadap topik-topik material sesuai dengan diskusi/masukan dari beberapa unit kerja terkait: *Operations Strategy*, *Corsec & Investor Relations*, dan *Enterprise Risk Management*.
3. *Engage*:
  - a. Melakukan survei dan/atau *direct interview* terhadap pemangku kepentingan untuk mengidentifikasi tingkat preferensi dari masing-masing topik material.
  - b. Identifikasi tingkat preferensi dilakukan melalui 2 (dua) tahapan:
    - i) Tahap pertama adalah tahapan untuk melihat tingkat signifikansi dampak dari setiap topik material terhadap masyarakat dan/atau lingkungan;
    - ii) Tahap kedua: dilakukan untuk melihat dampak risiko/peleluang yang muncul dari setiap topik material terhadap kinerja keuangan Bank.
  - c. Survei dilakukan dengan cara meminta para pemangku kepentingan untuk mengurutkan tingkat signifikansi dampak, mulai dari yang paling signifikan sampai dengan yang paling tidak signifikan, baik terhadap masyarakat dan/atau lingkungan, maupun terhadap kinerja keuangan Bank.
  - d. Menentukan urutan dari topik-topik material berdasarkan pilihan pemangku kepentingan: topik material terpenting adalah topik yang paling banyak dipilih pemangku kepentingan dengan urutan teratas, sementara topik yang dianggap paling tidak signifikan adalah topik yang paling banyak dipilih dengan urutan terbawah.
4. *Prioritize*:
  - a. Membuat *scatter plot graph*/pemetaan terhadap hasil survei:
    - i) Y axis: *scatter plot* untuk dampak dari masing-masing topik material terhadap masyarakat dan/atau lingkungan; dan
    - ii) X axis: *scatter plot* untuk dampak risiko/peleluang yang muncul dari setiap topik material terhadap kinerja keuangan Bank.
  - b. Membagi grafik menjadi 4 (empat) kuadran.
  - c. Memfokuskan topik material yang ada pada kuadran kanan atas ("*High Priority*" atau kuadran yang menunjukkan tingkat signifikansi dampak yang tinggi terhadap masyarakat dan lingkungan maupun dampak terhadap kinerja keuangan Bank).
5. *Approval*:
  - a. Mempresentasikan hasil pemetaan (khususnya topik material yang berada di kuadran "*High Priority*") dan rekomendasi (berdasarkan masukan langsung dari pemangku kepentingan, apabila ada) kepada *senior management* untuk mendapatkan validasi terhadap hasil kajian akhir.
  - b. Sharing metodologi dan hasil kajian dalam Laporan Keberlanjutan tahun 2023.
- b. Make adjustments to material topics in accordance with discussions/input from several related work units: *Operations Strategy*, *Corsec & Investor Relations*, and *Enterprise Risk Management*.
  3. *Engage*:
    - a. Conduct survey and/or direct interviews with stakeholders to identify the level of preference for each material topic.
    - b. Identification of the level of preference is carried out through 2 (two) stages:
      - i) The first stage is the stage to see the level of significance of the impact of each material topic on the society and/or the environment;
      - ii) The second stage: is carried out to see the impact of risks/opportunities arising from each material topic on the Bank's financial performance.
    - c. The survey is conducted by asking stakeholders to rank the level of significance of the impact, from the most significant to the least significant, both on society and/or the environment, as well as on the Bank's financial performance.
    - d. Define the order of material topics based on stakeholder choices: the most important material topics are those most frequently chosen by stakeholders in the top order, while the topics considered least significant are those most frequently chosen in the bottom order.
  4. *Prioritize*:
    - a. Create a scatter plot graph/mapping of the survey results:
      - i) Y axis: scatter plot for the impact of each material topic on society and/or the environment; and
      - ii) X axis: scatter plot for the impact of risks/opportunities arising from each material topic on the Bank's financial performance.
    - b. Divide the graph into 4 (four) quadrants.
    - c. Focus on material topics in the upper right quadrant ("*High Priority*" or quadrant that shows a high level of significance of the impact on society and the environment as well as the impact on the Bank's financial performance).
  5. *Approval*:
    - a. Present the mapping results (especially material topics in the "*High Priority*" quadrant) and recommendations (based on direct input from stakeholders, if any) to senior management to obtain validation of the final study results.
    - b. Share the methodology and study results in the 2023 Sustainability Report.

6. Penggunaan:

- Topik material yang ada pada "High Priority" dan sudah disetujui oleh *senior management* akan menjadi topik yang akan dilaporkan secara lebih detail dan menyeluruh dalam Laporan Keberlanjutan.
- Topik material juga akan digunakan untuk melakukan penyesuaian/*refinement* terhadap strategi keberlanjutan pada tahun berikutnya.

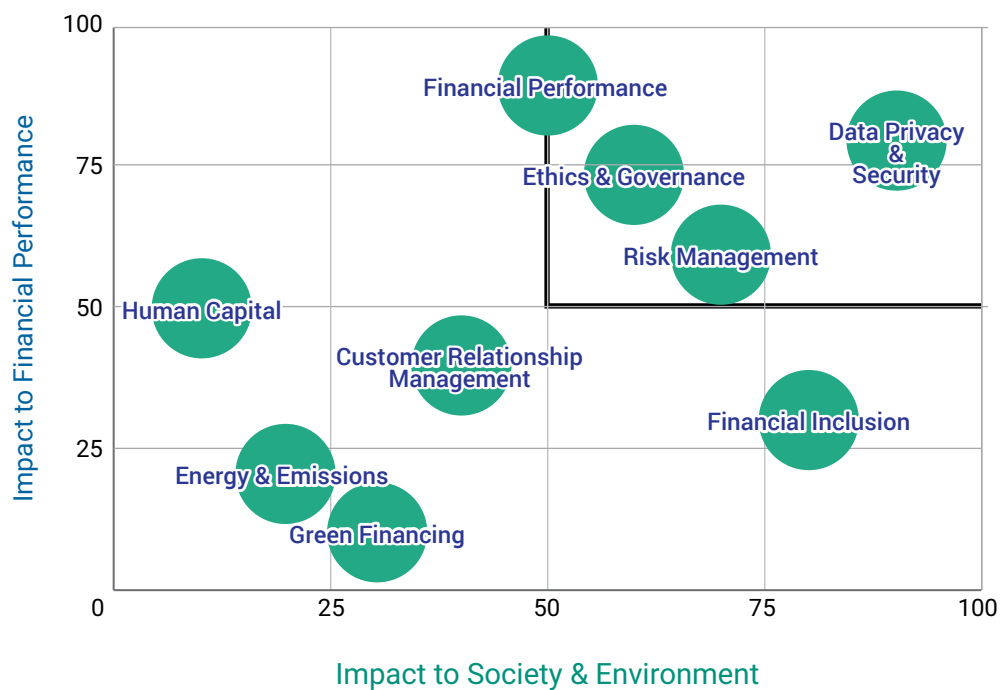

Dari tahapan pengukuran materialitas ganda yang telah dilakukan tersebut, Bank Aladin Syariah menetapkan 9 (sembilan) topik material sesuai urutan peringkat sebagaimana dapat dilihat di bawah ini.

6. Usage:

- Material topics listed in "High Priority" and approved by senior management will be the topics to be reported in more detail and comprehensively in the Sustainability Report.
- Material topics will also be used to make adjustments/refinements to the sustainability strategy in the following year.

From the double materiality measurement stage conducted, Bank Aladin Syariah has determined 9 (nine) material topics according to the ranking order as can be seen below.

Berdasarkan landasan keberlanjutan, strategi pengembangan Bank, masukan-masukan yang disampaikan oleh para pemangku kepentingan dan kajian terhadap pelaksanaan program-program keberlanjutan di tahun sebelumnya, Bank Aladin Syariah telah menetapkan strategi dan kerangka kerja keberlanjutan yang berfungsi sebagai panduan dalam menjalankan program-program dan aktivitas-aktivitas keberlanjutan. Mengacu kepada 4 (empat) pilar kerangka kerja keberlanjutan yang sama, strategi keberlanjutan Bank telah disesuaikan dan ditetapkan dengan penjabaran sebagai berikut.

Based on the sustainability foundation, the Bank's development strategy, inputs submitted by stakeholders, and a review of the implementation of sustainability programs in the previous year, Bank Aladin Syariah has established a sustainability strategy and framework that serves as a guide in implementing sustainability programs and activities. Referring to the same 4 (four) pillars of the sustainability framework, the Bank's sustainability strategy has been adjusted and established with the following description:

**Corporate Culture and Sharia Principles****Supported SDGs**

Agar fokus dan inisiatif dapat diturunkan dalam sebuah kebijakan yang sistematis, Bank Aladin Syariah merumuskan Peta Jalan Keberlanjutan Bank Aladin Syariah 2022-2026 sebagai arah pengembangan keberlanjutan yang akan dikembangkan ke depan. Disamping pengelolaan bisnis perbankan yang menguntungkan sesuai prinsip Syariah, salah satu tujuan besar strategi keberlanjutan Bank Aladin Syariah dapat mewujudkan net zero emissions di tahun 2040 atau lebih cepat.

With a view to translating the focus and initiative into a systematic policy, Bank Aladin Syariah has formulated the Bank Aladin Syariah Sustainability Roadmap 2022-2026 as a direction for sustainable development that will be developed in the future. In addition to managing a profitable banking business according to Sharia principles, one of the major goals of Bank Aladin Syariah's sustainability strategy is to achieve net zero emissions by 2040 or sooner.

### Para Pemangku Kepentingan yang Kami Hormati,

Perubahan iklim telah menimbulkan berbagai dampak negatif di dunia, termasuk Indonesia. Menurut Bank Dunia, dalam 5 (lima) tahun terakhir Indonesia telah mengalami peningkatan frekuensi bencana alam yang sebagian besar disebabkan oleh adanya perubahan iklim, dengan tren ke depan yang akan terus meningkat. Fenomena El Nino yang semakin kerap terjadi diperkirakan akan menyebabkan bencana kekeringan yang makin panjang sekaligus meningkatkan risiko terjadinya kebakaran hutan. Kondisi ini akan berdampak langsung terhadap pertumbuhan Indonesia, dimana Produk Domestik Bruto (PDB) Indonesia diproyeksikan mengalami penurunan sebesar 2,5% pada tahun 2045 apabila Indonesia tidak segera mengadopsi langkah-langkah adaptif terhadap fenomena perubahan iklim. Selain itu, perubahan iklim juga akan berdampak negatif terhadap tingkat produktivitas pekerja. International Labour Organization (ILO) memprediksi bahwa total jam kerja dari para pekerja Indonesia akan berkurang sebanyak 2,97% pada tahun 2030 akibat berbagai penyakit yang disebabkan oleh tingkat panas yang meningkat (*heat stress*).

Dampak perubahan iklim juga dipastikan akan mengganggu kelangsungan hidup seluruh masyarakat, khususnya Masyarakat Berpendapatan Rendah (MBR). Kelompok MBR dan rentan yang sebagian besar mata pencahariannya bergantung kepada sektor pertanian dan tinggal di daerah-daerah rawan bencana umumnya tidak memiliki kemampuan yang cukup untuk beradaptasi terhadap berbagai fenomena yang timbul akibat perubahan iklim. Selain itu, kelompok ini juga tidak memiliki akses layanan dan keuangan yang cukup untuk melindungi harta benda mereka di saat terjadi bencana.

Selain dampak perubahan iklim, industri perbankan juga akan dihadapkan oleh adanya berbagai tantangan lain dari sisi makro, antaranya adalah adanya perubahan kerangka kerja pelaporan keberlanjutan secara global yang cukup cepat, penerapan pengelolaan risiko-risiko yang terkait perubahan iklim serta kebijakan dan peraturan baru yang dikeluarkan oleh regulator terkait penerapan keuangan berkelanjutan.

## ASSALAMUALAIKUM WARAHMATULLAHI WABARAKATUH

### To Our Respected Stakeholders,

Climate change has caused various negative impacts in the world, including Indonesia. According to the World Bank, in the last 5 (ve) years Indonesia has experienced an increase in the frequency of natural disasters, most of which are caused by climate change, with the future trend continuing to increase. The increasingly frequent El Nino phenomenon is expected to cause longer droughts and increase the risk of forest fires. This condition will have a direct impact on Indonesia's growth, where Indonesia's Gross Domestic Product (GDP) is projected to decline by 2.5% in 2045 if Indonesia does not immediately adopt adaptive measures to the climate change phenomenon. In addition, climate change will also have a negative impact on worker productivity levels. The International Labor Organization (ILO) predicts that the total working hours of Indonesian workers will decrease by 2.97% in 2030 due to various diseases caused by increased heat stress.

The impact of climate change will also certainly disrupt the survival of the entire community, especially the Low-Income Community (MBR). MBR and vulnerable groups whose livelihoods are mostly dependent on the agricultural sector and live in disaster-prone areas generally do not have sufficient capacity to adapt to various phenomena arising from climate change. In addition, this group also has no sufficient access to services and finances to protect their property when a disaster occurs.

In addition to the impact of climate change, the banking industry will also face various other challenges from the macro side, including the rapid changes in the global sustainability reporting framework, the implementation of climate change-related risk management, and new policies and regulations issued by regulators related to the implementation of sustainable finance.

Munculnya perubahan iklim sebagai bagian dari dinamika penerapan keuangan berkelanjutan bagi industri jasa keuangan, termasuk bank komersial, menjadi tantangan tersendiri yang harus dijawab dengan tuntas. Industri jasa keuangan harus terlibat aktif untuk dapat menjadi solusi alternatif atas perilaku pelaku usaha dalam penerapan keberlanjutan. Salah satunya, Bank komersial dapat memulai dan meningkatkan porsi pembiayaan terhadap proyek-proyek yang ramah lingkungan, serta membantu nasabah dalam bertransisi menuju ekonomi rendah karbon ataupun beradaptasi terhadap perubahan iklim. Di samping itu, industri jasa keuangan juga dapat membantu masyarakat berpendapatan rendah dan rentan dalam memberikan akses layanan dan keuangan yang cukup untuk melindungi penghidupan mereka di saat terjadi bencana. Bank juga diharapkan dapat terus meningkatkan kapasitas dan kemampuannya sehingga mampu menghadapi tantangan-tantangan dari sisi makro yang terus berkembang.

## KEBIJAKAN MERESPON TANTANGAN

Dengan mengusung visi sebagai “Bank Syariah Digital Terdepan”, Bank Aladin Syariah berkomitmen untuk menerapkan program-program keberlanjutan yang selaras dengan berbagai isu dan tantangan yang dihadapi oleh para pemangku kepentingan. Kami berupaya mengintegrasikan prinsip-prinsip keberlanjutan ke dalam seluruh lini operasional sesuai nilai-nilai inti, Kerangka Kerja Strategi dan *Roadmap Keberlanjutan* periode 2022-2026, untuk memenuhi ambisi Bank dalam menuju *Net Zero Emissions* (NZE) pada tahun 2040 atau lebih cepat. Pengintegrasian prinsip-prinsip keberlanjutan dilakukan melalui penyempurnaan kebijakan dan kegiatan sosialisasi untuk meningkatkan pemahaman internal terhadap prinsip-prinsip keberlanjutan dan menanamkan budaya keberlanjutan.

Tata kelola sebagai salah satu pilar ESG juga mendapatkan perhatian yang cukup besar. Bank melakukan pengkajian dan penyesuaian terhadap strategi keberlanjutan berdasarkan masukan dari para pemangku kepentingan. Hal ini dilakukan agar strategi keberlanjutan Bank dapat selaras dengan kondisi internal, Tujuan Pembangunan Berkelanjutan (TPB) atau *Sustainability Development Goals* (SDGs), kebijakan regulator terkait penerapan keuangan berkelanjutan, serta perubahan pada kerangka kerja pelaporan keberlanjutan secara global. Kami juga menyusun Kebijakan Keberlanjutan yang akan digunakan sebagai acuan dalam setiap kebijakan dan prosedur terkait keberlanjutan di masa mendatang. Selanjutnya, kami melakukan reorganisasi, termasuk pada unit kerja *Sustainability*, untuk meningkatkan efisiensi dan efektivitas operasional Bank.

Untuk mendorong pencapaian kinerja di bidang sosial, Bank Aladin Syariah meluncurkan beberapa produk pembiayaan dan simpanan baru, yaitu *Ala Deposito* agar dapat memenuhi kebutuhan seluruh lapisan masyarakat, serta meningkatkan volume pembiayaan pada segmen UMKM sebagai bagian

Financial services industry players, including commercial banks, should have a moral obligation and business interests to proactively contribute to addressing the impacts of climate change. Commercial banks can initiate and increase the portion of financing for environmentally friendly projects, and help customers transition to a low-carbon economy or adapt to climate change. Additionally, banks can also help low-income and vulnerable communities by providing access to sufficient services and finance to protect their livelihoods in times of disaster. Banks are also expected to continuously increase their capacity and capabilities so that they can face the challenges from the macro side that continue to develop.

## POLICY TO RESPOND TO CHALLENGES

## Penerapan Keuangan Berkelanjutan

Bank mencatat pencapaian penting dalam mendukung transisi menuju ekonomi hijau dan inklusi keuangan yang dicanangkan oleh Pemerintah Indonesia. Setelah di tahun 2023 Bank Aladin Syariah memulai pembiayaan kepada Kegiatan Usaha Berwawasan Lingkungan (KUBL) dengan total baki debit pembiayaan hijau per 31 Desember 2024 sebesar Rp332 miliar. Pencapaian ini jauh melampaui target yang telah ditetapkan pada Rencana Aksi Keuangan Berkelanjutan (RAKB) tahun 2024 di mana Bank sebelumnya menargetkan total baki debit Pembiayaan KUBL sebesar Rp335 miliar. Selain itu, pembiayaan pada segmen UMKM juga melampaui target minimum pembiayaan UMKM sebesar 20% dari total portofolio pembiayaan, di mana total baki debit pembiayaan UMKM mencapai Rp2,13 triliun atau tumbuh sebesar 6,93% YoY, dengan kontribusi sebesar 44,89%. Secara keseluruhan, pembiayaan pada Kegiatan Usaha Berkelanjutan di tahun 2024 mencapai Rp2,46 triliun dengan kontribusi sebesar 51,89% terhadap total portofolio pembiayaan.

Pembiayaan pada KUBL sepenuhnya disalurkan ke debitur yang berkecimpung pada usaha pencegahan dan pengendalian polusi. Pembiayaan ini dilakukan dengan menggunakan skema produk modal kerja berbasis syariah guna mendukung kegiatan operasional debitur dalam pengelolaan limbah komersial, sehingga dapat mencegah terjadinya pencemaran yang berpotensi merusak lingkungan.

Dalam hal inklusi keuangan, kami terus meningkatkan porsi pembiayaan pada segmen UMKM melalui perluasan kerja sama dengan Alfamart Group dan mitra-mitra lain yang memiliki ekosistem UMKM yang besar, seperti PT Permodalan Nasional Madani ("PNM") yang merupakan bagian dari kelompok usaha PT Bank Rakyat Indonesia (Persero) Tbk. Kerja sama dengan Alfamart Group dilakukan dengan membiayai para pelaku usaha skala kecil-menengah guna memperkuat dan meningkatkan hubungan usaha mereka dengan Alfamart Group. Pembiayaan modal kerja diberikan kepada para pemasok dan kontraktor yang telah mendapatkan pekerjaan dari Alfamart Group. Sementara itu, pembiayaan kepada PNM dilakukan untuk mendukung modal kerja bagi usaha yang dimiliki oleh perempuan pra sejahtera melalui program Membina Ekonomi Keluarga Sejahtera (Mekaar), agar mereka dapat meningkatkan kesejahteraan keluarganya.

12. Cooperate with the UN Environment Program Finance Initiative (UNEP FI) within the corridor of technical assistance cooperation for the UN ASSIST JP Program to integrate the Indonesian Green Taxonomy (THI) into the Bank's internal processes.
13. Support various sustainability programs/initiatives that provide positive social/environmental impacts to the community.
14. Review and prepare the implementation of risk management related to climate change impacts.

## Implementation of Sustainable Finance

2023 was a historic year for Bank Aladin Syariah, where in that year we recorded important achievements in supporting the transition to a green economy and financial inclusion initiated by the Government of Indonesia. This year, Bank Aladin Syariah started to disburse financing to Environmentally Conscious Business Activities (KUBL) with a total outstanding green financing balance as of December 31, 2023 amounting to Rp332 billion. This achievement far exceeded the target set in the 2023 Sustainable Finance Action Plan (RAKB) where the Bank previously targeted a total outstanding KUBL Financing balance of Rp335 billion. In addition, financing in the MSME segment also exceeded the minimum target for MSME financing of 20% of the total financing portfolio, where the total outstanding MSME financing reached Rp2.13 trillion or grew 6.93% YoY, with a contribution of 44.89%. Overall, financing for Sustainable Business Activities in 2023 reached Rp2.46 trillion with a contribution of 51.89% to the total financing portfolio.

KUBL financing was fully distributed to debtors involved in pollution prevention and control efforts. This financing was carried out using a sharia-based working capital product scheme to support debtors' operational activities in commercial waste management, for the purpose of preventing pollution with the potential to damage the environment.

In terms of financial inclusion, we continue to increase the portion of financing in the MSME segment by expanding cooperation with Alfamart Group and other partners who have a large MSME ecosystem, such as PT Permodalan Nasional Madani ("PNM"), part of PT Bank Rakyat Indonesia (Persero) Tbk business group. Cooperation with Alfamart Group is carried out by financing small-medium scale businesses to strengthen and improve their business relationships with Alfamart Group. Working capital financing is provided to suppliers and contractors who have received work from Alfamart Group. Meanwhile, financing to PNM is carried out to support working capital for businesses owned by underprivileged women through the Membina Ekonomi Keluarga Sejahtera (Mekaar) program, so that they can improve their family's welfare.

Dari sisi pendanaan, produk-produk tabungan kami telah digunakan oleh segmen-segmen yang selama ini belum terlayani dengan baik. Pada tahun 2024, terdapat sebanyak 1.641 juta nasabah telah mendapatkan fasilitas berbagai produk simpanan Bank Aladin Syariah.

Kami terus melakukan pengawasan dan menjaga agar setiap pembiayaan yang diberikan telah sejalan dengan prinsip-prinsip keberlanjutan dan syariah. Hal ini tertuang dalam berbagai kebijakan yang berlaku saat ini, diantaranya pemberlakuan *exclusion list* dan persyaratan dokumen lingkungan dan kajian Analisis Mengenai Dampak Lingkungan (AMDAL) untuk sektor-sektor yang memiliki risiko sosial dan lingkungan yang tinggi.

Pada tahun 2024 Bank Aladin Syariah menandatangani Surat Kesepakatan untuk bekerja sama dengan UNEP FI di dalam koridor kerja sama bantuan teknis UN ASSIST JP Programme. Kerja sama ini diharapkan dapat membantu mengintegrasikan Taksonomi Hijau Indonesia (THI) dalam proses internal Bank sehingga kami dapat mengklasifikasi, melaporkan dan memonitor setiap pembiayaan kepada nasabah berdasarkan Taksonomi Hijau Indonesia versi 1.0 yang dikeluarkan oleh OJK. Hal ini tentunya dilakukan dengan tetap memperhatikan keamanan dan kenyamanan nasabah (*good customer experience*).

## Perjalanan Keberlanjutan (Sustainability Journey)

Bank Aladin Syariah telah mengkaji dan menetapkan kerangka kerja strategi keberlanjutan, serta menyesuaikan *roadmap* keberlanjutan. Penyesuaian ini didasarkan atas berbagai masukan dari para pemangku kepentingan, kondisi internal Bank, upaya pencapaian TPB/SDGs, kebijakan Pemerintah Indonesia terkait komitmen keberlanjutan, peraturan terkait keuangan berkelanjutan dan tantangan-tantangan lain yang muncul maupun akan muncul di masa mendatang. Kami juga telah mempublikasikan aspirasi untuk dapat mewujudkan *net zero emission* pada tahun 2040 atau lebih cepat, dengan serangkaian rencana transisi menuju aspirasi tersebut. Beberapa rencana transisi yang akan kami lakukan hingga tahun 2026 di antaranya meliputi:

1. Memperkuat kapasitas dalam mengelola risiko-risiko yang berhubungan dengan perubahan iklim.
2. Memperkuat kapasitas dalam menetapkan target penurunan emisi serta mengukur penurunan emisi sesuai pendekatan berbasis sains (*science-based*), termasuk pengukuran terhadap emisi dari nasabah yang dibiayai (*financed emission*).
3. Kajian terhadap kerangka kerja pelaporan keberlanjutan global, termasuk kerangka kerja ISSB (IFRS S1 dan IFRS S2).
4. Penetapan langkah-langkah untuk uji coba pelaporan dengan menggunakan kerangka kerja ISSB.

Untuk mendukung pelaksanaan rencana-rencana di atas, Bank telah melakukan pengukuran dan pemantauan terhadap jejak emisi karbon yang termasuk dalam cakupan

In terms of funding, our savings products have been used by segments that have not been well served so far. In 2024, a total of 1.641 million customers had access to various deposit products offered by Bank Aladin Syariah.

We continuously supervise and ensure that every financing provided is in line with the principles of sustainability and sharia. This is stated in various policies that are currently in effect, including the implementation of exclusion lists and environmental document requirements and Environmental Impact Analysis (AMDAL) studies for sectors that have high social and environmental risks.

In 2024, Bank Aladin Syariah signed a Letter of Understanding to collaborate with UNEP FI within the corridor of technical assistance cooperation for the UN ASSIST JP Programme. This collaboration is expected to help integrate the Indonesian Green Taxonomy (THI) into the Bank's internal processes so that we can classify, report and monitor every financing to customers based on the Indonesian Green Taxonomy version 1.0 issued by the OJK. This is of course done while still paying attention to customer safety and comfort (*good customer experience*).

## Sustainability Journey

Bank Aladin Syariah has reviewed and established a sustainability strategy framework, and adjusted the sustainability roadmap. This adjustment is based on various inputs from stakeholders, the Bank's internal conditions, efforts to achieve TPB/SDGs, Indonesian Government policies related to sustainability commitments, regulations related to sustainable finance and other challenges that have emerged or will emerge in the future. We have also published aspirations to be able to realize net zero emissions by 2040 or sooner, with a series of transition plans towards this aspiration. Some of the transition plans we will carry out until 2026 include:

1. Strengthening capacity in managing risks related to climate change.
2. Strengthening capacity in setting emission reduction targets and measuring emission reductions according to a science-based approach, including measuring emissions from financed customers.
3. Reviewing global sustainability reporting frameworks, including the ISSB framework (IFRS S1 and IFRS S2).
4. Determining steps for reporting trials using the ISSB framework.

To support the implementation of the above plans, the Bank has been measuring and monitoring the carbon emission footprint included in scope 1, scope 2, and part of scope

1, cakupan 2, dan sebagian cakupan 3 sejak tahun 2021. Pada tahun 2024, jumlah emisi Gas Rumah Kaca (GRK) yang termasuk dalam cakupan 1, cakupan 2 dan sebagian cakupan 3 khususnya yang berasal dari mobilitas karyawan, konsumsi listrik oleh pemasok data center, dan perjalanan dinas tercatat sebesar 422,16 tCO<sub>2</sub>eq, atau turun sebesar 2,94% YoY. Penurunan ini disebabkan diberlakukannya pembatasan penggunaan listrik untuk lingkungan kantor, kami berhasil menekan pertumbuhan konsumsi listrik dengan penurunan sebesar 3,74% YoY.

Melalui kegiatan pengelolaan limbah dan daur ulang, Bank Aladin Syariah bekerja sama dengan pihak ketiga untuk memilah dan mengelola sampah operasional menjadi limbah organik, anorganik dan residu. Dari pemilahan dan pengelolaan tersebut, kami berhasil meningkatkan jumlah limbah yang dapat digunakan kembali sehingga mengurangi volume sampah yang dibuang ke TPA, di mana volume sampah residu tercatat naik sebesar 125,97% YoY menjadi 3,41 ton. Hal ini setara dengan upaya penyelamatan 1.920,65 kgCO<sub>2</sub>eq apabila limbah yang tidak dikelola dengan baik dibuang ke TPA dan dibakar.

Sebagai bagian dari komitmen Bank dalam menjaga kelestarian lingkungan, Bank Aladin Syariah melanjutkan program penanaman dan perawatan bibit bambu di wilayah Magelang, Jawa Tengah bekerja sama dengan Forum Komunikasi Direktur Kepatuhan Perbankan (FKDKP), PPATK dan Yayasan Kehati. Di tahun 2024 Bank Aladin Syariah belum menghitung potensi serapan emisi GRK dan penyimpanan karbon dari program ini.

Selanjutnya Bank secara aktif melakukan sosialisasi dan implementasi terkait penerapan prinsip-prinsip keberlanjutan. Sosialisasi secara internal terhadap tips-tips praktis mengenai Aktivitas Ramah Lingkungan, Pengurangan Penggunaan Kantong Plastik, dan Pemanfaatan Barang Bekas dilakukan melalui media *wallpaper*. Sementara itu sosialisasi secara eksternal dilakukan melalui media sosial dengan tema Mengelola Sampah Dapur, Bersepeda, Tips Bijak Pakai Listrik, Penggunaan *Tote Bag*, *Decluttering* Pakaian, Daur Ulang, Liburan Berkelanjutan, Memperingati Hari Bumi, *Hampers* Lebaran, dan Upaya Pencegahan Polusi Udara.

Dalam bidang sosial, Bank Aladin Syariah berkomitmen terhadap penerapan prinsip-prinsip keberlanjutan yang berkaitan dengan aspek kepegawaian, perlindungan dan pengelolaan hubungan pelanggan, literasi dan inklusi keuangan, serta kontribusi terhadap pengembangan masyarakat. Dari sisi kepegawaian, Bank berkomitmen untuk menjamin peluang yang setara bagi seluruh karyawan tanpa memandang aspek gender, suku, ras, maupun agama untuk berkarir.

Komitmen ini terukur melalui pemantauan terhadap indikator-indikator berbasis gender, seperti komposisi karyawan perempuan yang telah menduduki level manajerial dari jumlah manajer yang tercatat sebesar 40% dan rata-rata kesenjangan upah gender (*mean gender pay gap*) dengan persentase

3 since 2021. In 2024, the total Greenhouse Gas (GHG) emissions under Scope 1, Scope 2, and parts of Scope 3—specifically those arising from employee mobility, electricity consumption by data center providers, and business travel—were recorded at 422.16 tCO<sub>2</sub> eq, representing a 2.94% year-on-year decrease. This reduction was driven by the implementation of electricity usage restrictions in office environments, which led to a 3.74% YoY decrease in electricity consumption.

Through waste management and recycling activities, Bank Aladin Syariah collaborates with third parties to sort and manage operational waste into organic, inorganic and residual waste. Through our waste sorting and management efforts, we successfully increased the amount of waste that could be reused, thereby reducing the volume of waste sent to landfills. However, the volume of residual waste rose by 125.97% YoY to 3.41 tons. This is equivalent to an avoided emission of 1,920.65 kgCO<sub>2</sub> eq, had the unmanaged waste been disposed of in landfills and incinerated.

As part of its commitment to environmental sustainability, Bank Aladin Syariah continued its bamboo planting and maintenance program in the Magelang area, Central Java, in collaboration with the Forum for Banking Compliance Directors (FKDKP), PPATK, and the Kehati Foundation. In 2024, Bank Aladin Syariah has not yet calculated the potential GHG emission absorption and carbon sequestration from this program.

Furthermore, the Bank actively conducted dissemination related to the implementation of sustainability principles. Internal dissemination of practical tips on Eco-Friendly Activities, Reducing the Use of Plastic Bags, and Utilizing Used Goods was carried out through wallpaper media. Meanwhile, external dissemination was carried out through social media with the themes of Managing Kitchen Waste, Cycling, Tips for Wise Use of Electricity, Using Tote Bags, Decluttering Clothes, Recycling, Sustainable Vacations, Commemorating Earth Day, Eid Hampers, and Efforts to Prevent Air Pollution.

In the social sector, Bank Aladin Syariah is committed to implementing sustainability principles related to aspects of personnel, protection and management of customer relationships, financial literacy and inclusion, and contribution to community development. In terms of personnel, the Bank is committed to ensuring equal opportunities for all employees regardless of gender, ethnicity, race, or religion to pursue a career.

## Demografi karyawan [C.3] [2-7; 2-8]

### Employee Demographics [C.3] [2-7; 2-8]

Per 31 Desember 2024, Bank memiliki karyawan sebanyak 290 orang, berkurang 1 orang atau sebesar 0,34% bila dibandingkan dengan jumlah pegawai pada tahun sebelumnya.

As of December 31, 2024, the Bank had 290 employees, an decrease of 1 person or 0.34%% compared to the number of employees in the previous year.

Dalam menjalankan usaha, Bank membagi karyawan berdasarkan status yaitu pegawai tetap dan tidak tetap, dan tidak membagi karyawan berdasarkan waktu kerja, yaitu pegawai purna waktu dan paruh waktu. Selain itu, pada tahun pelaporan, Bank mempekerjakan pegawai bukan karyawan, seperti alih daya (*outsourcing*).

In running the business, the Bank classifies employees based on their status, namely permanent and temporary employees, and does not classify employees based on working time, namely full-time and part time employees. In addition, in the reporting year, the Bank engaged indirect employees, such as outsourced employees.

Di sisi lain, sebagai bank digital, Bank hanya berkantor di Jakarta dan tidak memiliki kantor cabang maupun kantor perwakilan. Dengan demikian, Bank tidak menyampaikan komposisi karyawan berdasarkan wilayah kerja di luar Jakarta. Selain itu, Bank juga tidak mempublikasikan data karyawan berdasarkan keterikatan jam kerja karena tidak mempekerjakan karyawan yang tidak terikat dengan jam kerja (*non-guaranteed hours employee*). Komposisi pegawai, termasuk pegawai yang dikontrak secara langsung oleh Bank, selengkapnya disajikan dalam tabel-tabel di bawah ini.

On the other hand, as a digital bank, the Bank only has an office in Jakarta and does not have branch offices or representative offices. Thus, the Bank does not present the employee composition based on work areas outside Jakarta. The Bank also does not publish employee data based on working hours as it does not employ employees who are not bound by working hours (non-guaranteed hours employees). The employee composition, including employees contracted directly by the Bank, is presented in full in the tables below.

# Permasalahan Terhadap Penerapan Kegiatan Berkelanjutan [E.5]

## Issues in Implementing Sustainable Activities [E.5]

Bank berkomitmen untuk menerapkan program dan kegiatan yang selaras dengan aspek keberlanjutan sebagaimana disampaikan dalam Rencana Bisnis Bank (RBB) Periode 2023-2025 dan Rencana Aksi Keuangan Berkelanjutan (RAKB) Tahun 2024. Selama tahun pelaporan, manajemen dan karyawan Bank telah berupaya secara maksimal melaksanakan program-program dalam RBB dan RAKB tersebut.

Dalam penerapan keuangan berkelanjutan dan pengintegrasian aspek keberlanjutan di lingkungan internal Bank, Bank menghadapi permasalahan-permasalahan yang meliputi:

1. Lingkungan internal Bank:
  - a. Isu mengenai prioritas: penerapan keuangan berkelanjutan terkendala karena adanya berbagai proyek eksisting dengan tingkat prioritas yang tinggi di hampir seluruh departemen, terutama yang terkait dengan peluncuran produk-produk baru.
  - b. Pemahaman terhadap penerapan keuangan berkelanjutan dan aspek keberlanjutan yang belum merata di kalangan internal Bank karena cukup banyak karyawan baru di tahun 2023.
2. Lingkungan eksternal:
  - a. Pemahaman terhadap praktik-praktik keberlanjutan yang masih belum merata di kalangan pemangku kepentingan eksternal, terutama para pelaku industri dan masyarakat umum.
  - b. Tingkat perekonomian yang belum sepenuhnya pulih akibat dampak pandemi COVID-19 yang disertai dengan meningkatnya krisis geopolitik di berbagai belahan dunia.

Menghadapi permasalahan-permasalahan tersebut, Bank telah merumuskan dan menerapkan berbagai langkah dan kebijakan strategis yang meliputi:

1. Lingkungan internal Bank:
  - a. Menetapkan wakil dari masing-masing unit kerja terkait untuk memastikan penerapan keuangan berkelanjutan di masing-masing unit kerja dapat terlaksana sesuai dengan Rencana Aksi Keuangan Berkelanjutan (RAKB).
  - b. Meningkatkan pemahaman dan kapasitas internal melalui sosialisasi dan pelatihan terkait keuangan berkelanjutan yang dilaksanakan oleh Bank Aladin Syariah maupun oleh pihak eksternal.
  - c. Partisipasi dalam program-program yang dicanangkan oleh UN Principles for Responsible Banking (UNPRB) dan UN Global Compact (UNGC), seperti the Business & Human Rights Accelerator Program, guna memperkuat komitmen Bank dalam penerapan aspek keberlanjutan.

The Bank is committed to implementing programs and activities aligned with sustainability aspects, as outlined in the Bank's Business Plan (RBB) for the 2023-2025 period and the Sustainable Finance Action Plan (RAKB) for 2024. Throughout the reporting year, the Bank's management and employees have made maximum efforts to implement the programs within the RBB and RAKB.

In the implementation of sustainable finance and the integration of sustainability aspects within the Bank's internal environment, several challenges have been encountered, including:

1. Internal Environment of the Bank:
  - a. Prioritization Issues: The implementation of sustainable finance has been hindered by the presence of various existing projects with high priority levels across almost all departments, particularly those related to the launch of new products.
  - b. Mix level of awareness of sustainable finance implementation and sustainability aspects within the Bank's internal environment due to the significant number of new employees in 2023.
2. External Environment:
  - a. Mix level of awareness of sustainability practices among external stakeholders, particularly industry players and the general public.
  - b. The economy has not fully recovered from the impacts of the COVID-19 pandemic, compounded by escalating geopolitical crisis in various parts of the world.

To address these challenges, the Bank has formulated and implemented various strategic measures and policies, including:

1. Internal Environment of the Bank:
  - a. Appointing representatives from each relevant business unit to ensure the sustainable finance implementation is carried out in alignment with the Sustainable Finance Action Plan (RAKB).
  - b. Enhancing internal understanding and capacity through socialization and training on sustainable finance, conducted both by Bank Aladin Syariah and external parties.
  - c. Participating in programs initiated by the UN Principles for Responsible Banking (UNPRB) and the UN Global Compact (UNGC), such as the Business & Human Rights Accelerator Program, to strengthen the Bank's commitment to sustainability practices.

## 2. Lingkungan eksternal:

- Memperluas kerjasama dengan mitra-mitra eksisting serta mitra-mitra baru dalam penerapan keuangan berkelanjutan.
- Turut berkontribusi dalam dialog keuangan berkelanjutan dengan berbagai pemangku kepentingan untuk meningkatkan sinergi lintas instansi dan memperluas penerapan keuangan berkelanjutan di Indonesia.

## 2. External Environment:

- Expanding collaboration with both existing and new partners in the implementation of sustainable finance
- Actively contributing to sustainable finance dialogues with various stakeholders to enhance cross-institutional synergy and broaden the adoption of sustainable finance in Indonesia

## KETERLIBATAN MASYARAKAT LOKAL DALAM RANTAI PASOKAN

Bank Aladin Syariah menjalin kerja sama dengan berbagai pemasok/vendor untuk memaksimalkan nilai dari para pemangku kepentingan dan mendukung kegiatan operasional Bank secara berkelanjutan. Oleh karena itu, Bank senantiasa menjaga hubungan baik dan rutin berkomunikasi dengan para vendor, khususnya pemasok barang dan jasa yang dianggap kritikal terhadap kelangsungan usaha Bank, guna mengantisipasi kemungkinan terjadinya gangguan dalam aktivitas operasional mereka. [3-3]

Terkait dengan aspek berkelanjutan, Bank Aladin Syariah berupaya untuk memahami dampak sosial dan lingkungan dari kegiatan operasional Bank melalui rantai pasokan yang dimiliki. Beberapa inisiatif terkait yang telah dilakukan Bank pada tahun 2024 antara lain:

1. Melakukan pengukuran tingkat konsumsi energi dari server/backup server Bank Aladin Syariah yang dikelola oleh vendor.
2. Menunjuk perusahaan jasa konsultan dalam bidang karbon dan keberlanjutan, untuk menghitung emisi cakupan 1, 2 dan 3, termasuk emisi penggunaan energi dari mobilitas karyawan dan perjalanan dinas.
3. Melanjutkan kerjasama dengan Rekosistem untuk melakukan jasa pemilahan dan pengelolaan limbah operasional Bank, serta menghitung dampak lingkungan dari pemilahan dan pengelolaan limbah tersebut.
4. Memperbaharui dan menerapkan Pakta Integritas untuk pemasok/vendor yang mewajibkan pemasok/vendor untuk mematuhi peraturan perundang-undangan yang berlaku, tidak melakukan praktik fraud, suap/gratifikasi, korupsi, kolusi dan nepotisme, serta berkomitmen dalam menerapkan prinsip-prinsip keberlanjutan yang mencakup aspek ketenagakerjaan, lingkungan, hak asasi manusia, serta perlindungan dan keamanan data.

Sejalan dengan prinsip memberikan kontribusi maksimal terhadap pertumbuhan ekonomi daerah, khususnya Jakarta, Bank mengutamakan pemasok lokal dalam rantai pasokan. Pemasok lokal adalah mereka yang menjalankan usaha dan berdomisili dengan area satu provinsi dengan operasional Bank, yaitu Jakarta. Apabila pemasok lokal tidak bisa menyediakan kebutuhan barang dan jasa yang diperlukan Bank, maka Bank akan menjalin kerja sama dengan pemasok nasional, yaitu pemasok yang menjalankan usaha dan berdomisili di luar Jakarta, namun masih berada di Indonesia. Selanjutnya, apabila pemasok lokal dan nasional tidak bisa menyediakan kebutuhan barang dan jasa yang diperlukan Bank atau dengan pertimbangan tertentu, Bank akan bekerja sama dengan pemasok asing/internasional, yaitu mereka yang menjalankan usaha dan berdomisili di luar Indonesia. [3-3]

Berdasarkan kriteria di atas, pemasok barang dan jasa selengkapnya disajikan dalam tabel berikut:

## LOCAL COMMUNITY ENGAGEMENT IN THE SUPPLY CHAIN

To maximize stakeholder value and support sustainable operational activities, various collaborations have been established by Bank Aladin Syariah with multiple suppliers/vendors. Good relationships are consistently maintained, and regular communication is conducted with vendors, particularly those supplying critical goods and services essential to the Bank's business continuity, to anticipate potential disruptions in their operations.

Regarding sustainability aspects, efforts have been made by Bank Aladin Syariah to understand the social and environmental impacts of its operational activities through its supply chain. Several related initiatives undertaken by the Bank in 2024 include:

1. Measuring energy consumption levels of Bank Aladin Syariah's servers/backup servers managed by vendors.
2. Appointing a consulting firm specializing in carbon and sustainability to calculate Scope 1, 2, and 3 emissions, including energy consumption emissions from employee mobility and business travel.
3. Continuing collaboration with Rekosistem for waste sorting and management services related to the Bank's operational waste, as well as assessing the environmental impact of such waste sorting and management.
4. Updating and implementing an Integrity Pact for suppliers/vendors, requiring them to comply with applicable laws and regulations, refrain from fraudulent practices, bribery/gratification, corruption, collusion, and nepotism, and commit to sustainability principles, including labor, environmental, human rights, and data protection and security aspects.

In accordance with the principle of maximizing contributions to regional economic growth, particularly in Jakarta, priority has been given to local suppliers within the supply chain. Local suppliers are defined as those operating and domiciled within the same province as the Bank's operations, namely Jakarta. If the required goods and services cannot be provided by local suppliers, collaborations are pursued with national suppliers of whom those operating and domiciled outside Jakarta but still within Indonesia. Furthermore, if neither local nor national suppliers can fulfill the Bank's requirements, or if specific considerations necessitate it, partnerships are formed with foreign/international suppliers of whom those operating and domiciled outside Indonesia.

Based on these criteria, a detailed list of goods and service suppliers is presented in the following table:

## Equitable Environmental Management

Meskipun kegiatan operasional industri perbankan memiliki dampak lingkungan yang relatif lebih kecil bila dibandingkan dengan industri-industri lain seperti pertambangan, energi, pertanian dan manufaktur, perbankan memiliki peran dan tanggung jawab yang tinggi untuk mewujudkan kelestarian lingkungan. Dalam praktiknya, peran dan tanggung jawab industri perbankan tersebut dapat terlaksana melalui:

1. Pembuatan dan pengembangan produk-produk perbankan yang dapat mendorong berbagai inisiatif pelestarian lingkungan secara komersial.
2. Pemberian pembiayaan investasi untuk proyek-proyek ramah lingkungan.
3. Pemberian bantuan teknis kepada nasabah-nasabah eksisting untuk membantu mempercepat transisi ke ekonomi yang rendah karbon.
4. Penetapan risiko sosial dan lingkungan sebagai bagian dari kerangka kerja pengelolaan risiko bank.
5. Implementasi energy management system untuk menekan emisi karbon dari kegiatan operasional.
6. Partisipasi aktif dalam kerangka kerja sama pembangunan berkelanjutan dengan berbagai pemangku kepentingan.

Di Indonesia, komitmen dan kontribusi perbankan terhadap kelestarian lingkungan merupakan implementasi terhadap Undang-Undang Republik Indonesia No. 10 Tahun 1998 tentang Perubahan atas Undang-Undang No. 7 Tahun 1992 tentang Perbankan, yang di dalamnya mengatur tentang prinsip kehati-hatian dalam penyaluran kredit. Regulasi tentang perlunya perbankan berkontribusi terhadap kelestarian lingkungan selanjutnya diatur dalam Undang-Undang Republik Indonesia No. 32 Tahun 2009 tentang Perlindungan dan Pengelolaan Lingkungan Hidup, di mana dalam Pasal 43, ayat (3), huruf c terdapat klausul mengenai "Pengembangan sistem lembaga keuangan dan pasar modal yang ramah lingkungan hidup".

Dalam perkembangannya, kemudian terbit Peraturan OJK No. 51/POJK.03/2017 tentang Penerapan Keuangan Berkelanjutan bagi Lembaga Jasa Keuangan, Emiten dan Perusahaan Publik (POJK Keuangan Berkelanjutan). Dengan peraturan ini, perbankan sebagai lembaga jasa keuangan wajib menerapkan prinsip keuangan berkelanjutan atau sustainable finance, yang didefinisikan sebagai dukungan menyeluruh dari industri jasa keuangan untuk pertumbuhan berkelanjutan yang dihasilkan dari keselarasan antara kepentingan ekonomi, sosial, dan lingkungan hidup. Penerapan keuangan berkelanjutan diperlukan sebagai modal penting untuk mewujudkan pembangunan berkelanjutan, sejalan dengan komitmen mayoritas negara-negara di dunia, termasuk Indonesia, untuk membatasi kenaikan tingkat pemanasan global hingga 1,5 derajat Celsius.

Although the operational activities of the banking industry have a relatively smaller environmental impact compared to other industries such as mining, energy, agriculture, and manufacturing, banks hold a significant role and responsibility in achieving environmental sustainability. In practice, this role and responsibility can be fulfilled through:

1. The creation and development of banking products of which commercially promote various environmental conservation initiatives.
2. Financing investments for eco-friendly projects.
3. Providing technical assistance to existing customers to help accelerate the transition to a low-carbon economy.
4. Integrating social and environmental risks as part of the bank's risk management framework.
5. Implementing an energy management system to reduce carbon emissions from operational activities.
6. Actively participating in sustainable development cooperation frameworks with various stakeholders.

In Indonesia, the banking sector's commitment and contribution to environmental sustainability are implemented in accordance with Law No. 10 of 1998, which amends Law No. 7 of 1992 on Banking, stipulating the principle of prudence in loans disbursement. Further regulations emphasizing the need for banking institutions to contribute to environmental sustainability are outlined in Law No. 32 of 2009 on Environmental Protection and Management, specifically in Article 43, Paragraph (3), Subparagraph (c), which includes a clause on "The development of an eco-friendly financial institution and capital market system."

Over time, this commitment has been reinforced through the issuance of Financial Services Authority Regulation No. 51/POJK.03/2017 on the Implementation of Sustainable Finance for Financial Services Institutions, Issuers, and Public Companies (POJK on Sustainable Finance). This regulation mandates the banks, as financial service institutions, adopt sustainable finance principles, which are defined as comprehensive support from the financial services industry for sustainable growth by aligning economic, social, and environmental interests. The implementation of sustainable finance is essential as a crucial foundation for achieving sustainable development, in line with the global commitment, including Indonesia, to limit the rise in global warming to 1.5 degrees Celsius.

## KOMITMEN BANK ALADIN SYARIAH [3-3]

Bank Aladin Syariah berkomitmen untuk mendukung penerapan keuangan berkelanjutan, termasuk dalam bidang lingkungan, sesuai dengan statusnya sebagai penandatangan United Nations Principles for Responsible Banking (UNPRB) dan anggota UN Global Compact. Komitmen tersebut antara lain diwujudkan melalui berbagai program dan inisiatif di bawah pilar ke-4: Kesadaran Bertindak untuk Menjaga Kelestarian Bumi (*Act with Conscience for the Planet*) dalam Kerangka Kerja Keberlanjutan Bank Aladin Syariah. Pilar ini mengacu kepada komitmen Bank untuk menjaga dan melestarikan lingkungan melalui Jejak Lingkungan (*Environmental Footprint*), Pembiayaan Sektor-sektor Hijau (*Green Financing*) dan Pengelolaan Penggunaan Energi (*Energy Management*).

## COMMITMENT OF BANK ALADIN SYARIAH [3-3]

Bank Aladin Syariah is committed to supporting the implementation of sustainable finance, including in the environmental sector, in accordance with its status as a signatory of the United Nations Principles for Responsible Banking (UNPRB) and a member of the UN Global Compact. This commitment is realized through various programs and initiatives under the fourth pillar: Act with Conscience for the Planet within the Bank Aladin Syariah Sustainability Framework. This pillar reflects the Bank's dedication to preserving and protecting the environment through Environmental Footprint, Green Financing, and Energy Management.

The Bank's commitment to environmental sustainability is also demonstrated through the establishment of policies and procedures aligned with social and environmental sustainability principles, including the formulation of an exclusion list comprising business sectors or activities with negative social and environmental impacts and are therefore ineligible for financing, as well as procedures for managing risks associated with environmentally and socially responsible business activities.

In line with this, various policies and initiatives in environmental conservation efforts are continued, established, and developed by the Bank, including:

1. Establishment of the ambition to achieve *Net Zero Emissions* by 2040.
2. Setting a target for financing eco-friendly sectors at a minimum of 1% of total productive financing starting in 2023, increasing to 5% of total productive financing by 2026.
3. Implementation of an exclusion list.
4. Enforcement of requirements for environmental documentation compliance and Environmental Impact Analysis (AMDAL) and PROPER studies for companies with significant environmental impacts.
5. Initiating financing for Eco-Friendly Business Activities (KUBL).
6. Integration of environmental aspects into the Bank's Code of Ethics and Conduct Guidelines.
7. Establishment of a target for the implementation of the *Energy Management System* by 2026.
8. Regulation of air conditioning usage and temperature settings in the workplace to reduce energy consumption.
9. Collaboration with the United Nations Environment Programme Finance Initiative (UNEP FI) to enhance the implementation process of Indonesia's Green Taxonomy and develop the Sustainable Finance Framework.

10. Menunjuk PT Dekarbon Nusantara Unggul, perusahaan jasa konsultasi di bidang karbon dan keberlanjutan, dalam melakukan pengukuran jejak karbon/emisi gas rumah kaca terhadap aktivitas operasional Bank, terutama emisi cakupan 1, cakupan 2 dan sebagian emisi dalam cakupan 3 (khususnya terkait dengan mobilitas karyawan, konsumsi listrik oleh vendor data center dan perjalanan dinas).
11. Melanjutkan kerja sama dengan Rekosistem dalam pemilahan dan pengelolaan limbah operasional.
12. Melakukan kampanye dan sosialisasi dengan tema peduli lingkungan, seperti Tips Bijak Pakai Listrik, Bersepeda, Daur Ulang, Mengelola Sampah Dapur, Liburan Berkelanjutan, dan Penggunaan Tote Bag, melalui media internal dan media-media sosial.
13. Melanjutkan program-program CSR eksisting yang memiliki dampak positif terhadap lingkungan:
  - a. Program Green Tourism bekerja sama dengan Yayasan Sinar Utama Nusantara (SUN).
  - b. Program Pengumpulan Limbah Botol Plastik bekerja sama dengan Plastic Bank Indonesia.
  - c. Program Penanaman dan Pemeliharaan Rumpun Bambu bekerja sama dengan Yayasan Kehati, Forum Komunikasi Direktur Kepatuhan Perbankan (FKDKP) dan Pusat Pelaporan dan Analisis Transaksi Keuangan (PPATK).
  - d. Komitmen Bank Aladin Syariah terhadap lingkungan juga diwujudkan melalui operasional kantor yang ramah lingkungan dengan menerapkan prinsip 3R (Reduce, Reuse and Recycle). Prinsip tersebut diimplementasikan dalam pengelolaan kertas, energi, emisi, limbah dan sebagainya.

## PENGELOLAAN KERTAS SEBAGAI MATERIAL DALAM KEGIATAN OPERASI BANK [F.5]

Kertas merupakan salah satu kebutuhan penting dalam operasional Bank Aladin Syariah. Sebagai bank digital dengan jumlah kantor yang sangat terbatas, kebutuhan kertas tentu tidak sebanyak bank konvensional. Walau demikian, Bank telah berupaya secara maksimal untuk mengurangi penggunaan kertas, yang bahan bakunya dari pepohonan khusus yang diolah menjadi bubur kertas. Penghematan penggunaan kertas dilakukan antara lain dengan melakukan pengarsipan dokumen secara digital. Melalui penghematan tersebut otomatis Bank Aladin Syariah telah membantu kelestarian alam serta mengurangi penebangan pohon.

Adapun kertas-kertas yang sudah tidak bisa dipakai (limbah), walau volumenya kecil, Bank menyerahkan kepada pihak ketiga untuk didaur ulang (recycle) atau digunakan kembali (reuse). Sebelum diserahkan kepada pihak ketiga, limbah kertas berupa dokumen penting dihancurkan lebih dulu dengan mesin penghancur kertas. Walaupun kertas termasuk bahan baku/material yang bisa didaur ulang, namun Bank tidak menggunakan hasil daur ulang tersebut dalam operasional sehari-hari.

10. Appointing PT Dekarbon Nusantara Unggul, a consulting firm specializing in carbon and sustainability, to measure the Bank's carbon footprint/greenhouse gas emissions related to operational activities, particularly Scope 1, Scope 2, and certain emissions in Scope 3 (specifically related to employee mobility, electricity consumption by data center vendors, and business travel).
11. Continuing cooperation with Rekosistem in sorting and managing operational waste.
12. Conducting campaigns and awareness programs on environmental consciousness, such as Wise Electricity Use Tips, Cycling, Recycling, Managing Kitchen Waste, Sustainable Holidays, and Tote Bag Usage, through internal and social media channels.
13. Continuing existing CSR programs with a positive environmental impact:
  - a. Green Tourism Program in collaboration with Yayasan Sinar Utama Nusantara (SUN).
  - b. Plastic Bottle Waste Collection Program in collaboration with Plastic Bank Indonesia.
  - c. Bamboo Cluster Planting and Maintenance Program in collaboration with Yayasan Kehati, the Banking Compliance Directors Communication Forum (FKDKP), and the Financial Transaction Reports and Analysis Center (PPATK).
  - d. Bank Aladin Syariah's commitment to the environment is also reflected in its eco-friendly office operations by implementing the 3R principles (Reduce, Reuse, and Recycle). These principles are applied to paper, energy, emissions, waste management, and other operational aspects.

## PAPER MANAGEMENT AS A MATERIAL IN BANK OPERATIONS [F.5]

Paper is one of the essential materials in the operations of Bank Aladin Syariah. As a digital bank with a very limited number of physical offices, the need for paper is certainly lower than the conventional banks. Nevertheless, the Bank has made maximum efforts to reduce paper usage, as its raw material comes from specially cultivated trees processed into paper pulp. Paper usage reduction is achieved, among other measures, by digitizing document archiving. Through this initiative, Bank Aladin Syariah automatically contributes to environmental conservation and helps reduce deforestation.

Used paper waste, although minimal in volume, is handed over to third parties for recycling or reuse. Before being handed over, paper waste containing important documents is first destroyed using a paper shredder. While paper is a recyclable material, the Bank does not utilize recycled paper in its daily operations.

Pada tahun 2024, Bank menggunakan kertas sebanyak 460 rim, meningkat dibandingkan tahun 2023 sebanyak 405 rim. Kenaikan ini tak lepas dari kegiatan operasional Bank yang semakin meningkat.

In 2024, the Bank used a total of 460 reams of papers, an increase compared to 405 reams in 2023. This increase is related to the Bank's growing operational activities.

## PENGELOLAAN ENERGI

Operasional Bank Aladin Syariah memerlukan dua sumber energi utama, yaitu listrik dan bahan bakar minyak (BBM), yang dipasok oleh pihak ketiga. Selain untuk penerangan, listrik digunakan untuk sumber energi berbagai peralatan elektronik sarana dan sarana kantor, seperti komputer, laptop, mesin fotokopi, mesin AC, dan lain-lain. Adapun BBM digunakan sebagai sumber energi kendaraan operasional. Oleh karena listrik maupun BBM merupakan sumber energi tak terbarukan dan ketersediaannya semakin terbatas, maka Bank berkomitmen untuk melakukan berbagai langkah penghematan. [3-3]

Penghematan listrik antara lain dilakukan dengan mengoptimalkan penggunaan lampu hemat energi (LED), mematikan lampu dan AC ruangan saat tidak lagi digunakan. Adapun penghematan penggunaan BBM di antaranya dilakukan dengan membatasi jumlah kendaraan operasional. [F.7; F.12] [302-4; 305-5]

Selain wujud kepedulian terhadap kelestarian lingkungan, penghematan energi yang dilakukan Bank sejalan dengan Instruksi Presiden Republik Indonesia No. 13 Tahun 2011 tentang Penghematan Energi dan Air, serta Peraturan Menteri Energi dan Sumber Daya Mineral Republik Indonesia No. 13 Tahun 2012 tentang Penghematan Pemakaian Tenaga Listrik. Konsumsi BBM di tahun 2024 tercatat sebanyak 3.204 liter atau setara dengan 115,36 Gigajoule (GJ). Angka ini lebih rendah dibandingkan tahun 2023 yang disebabkan efisiensi operasional, pengurangan frekuensi perjalanan dinas, serta peningkatan penggunaan kendaraan berbasis listrik dan transportasi ramah lingkungan lainnya dalam aktivitas operasional perusahaan.

Untuk ke depan, Bank akan terus berupaya mengelola tingkat konsumsi BBM melalui perluasan konversi kendaraan operasional ke kendaraan berbasis listrik. [F.6] [302-1]

## ENERGY MANAGEMENT

The operations of Bank Aladin Syariah rely on two primary energy sources: electricity and fuel (BBM), both supplied by third parties. Electricity is used not only for lighting but also as a power source for various office electronic equipment, such as computers, laptops, photocopiers, air conditioning units, and others. Meanwhile, fuel is used as an energy source for operational vehicles. Given that both electricity and fuel are non-renewable energy sources with increasingly limited availability, the Bank is committed to implementing various energy-saving measures.

Electricity conservation efforts include optimizing the use of energy-efficient LED lighting and turning off lights and air conditioning when not in use. Meanwhile, fuel consumption is reduced by limiting the number of operational vehicles.

Beyond demonstrating concern for environmental sustainability, the Bank's energy-saving initiatives align with the Republic of Indonesia Presidential Instruction No. 13 of 2011 on Energy and Water Conservation, as well as the Energy and Mineral Resources Minister Regulation No. 13 of 2012 on Electricity Consumption Efficiency. In 2024, fuel consumption was recorded at 3,204 liters, equivalent to 115.36 Gigajoules (GJ). This figure is lower than in 2023, due to operational efficiencies, reduced business travel frequency, and increased use of electric vehicles and other environmentally friendly transportation in the Bank's operational activities.

Going forward, the Bank will continue striving to manage fuel consumption levels by expanding the conversion of operational vehicles to electric-based vehicles.

Adapun penggunaan listrik selama tahun 2024 sebanyak 257.625 kWh atau setara dengan 927.45 GJ, lebih tinggi dibandingkan penggunaan listrik tahun 2023 yang mencapai 266.113 kWh atau 958,01 GJ. Penurunan ini disebabkan meningkatnya kesadaran pegawai terhadap pentingnya penghematan energi dalam operasional sehari-hari.

Untuk ke depan, Bank akan berupaya mengelola penggunaan listrik melalui berbagai inisiatif dan kampanye penghematan penggunaan listrik di lingkungan kantor, seperti mematikan lampu apabila ruangan tidak dipergunakan dan mencabut stop kontak untuk peralatan elektronik yang tidak digunakan, selain melanjutkan kebijakan pembatasan penggunaan AC pada jam kerja. [F.6] [302-1]

The electricity consumption in 2024 amounted to 257,625 kWh or equivalent to 927.45 GJ, higher than the electricity consumption in 2023, which reached 266,113 kWh or 958.01 GJ. This decrease was due to the increased awareness among employees on the importance of energy conservation in daily operations.

Going forward, the Bank will strive to manage electricity usage through various initiatives and electricity-saving campaigns within the office environment, such as switching off unused lights and unplugging idle electronic devices, in addition to continuing the policy of limiting AC usage during working hours.

Berkaitan dengan Intensitas Konsumsi Energi (IKE) khususnya listrik, Bank Aladin Syariah belum melakukan audit energi pada kantor pusat. Untuk itu, Bank belum bisa menyampaikan IKE berdasarkan audit energi. Sebagai alternatif, penghitungan IKE dilakukan dengan menggunakan rumus berikut:

Regarding Energy Consumption Intensity (IKE), particularly electricity, Bank Aladin Syariah has not yet conducted an energy audit at its head office. As a result, the Bank is unable to report IKE based on an energy audit. Alternatively, IKE is calculated using the following formula:

$$\text{Intensitas Konsumsi Energi (IKE) Bangunan} = \frac{\text{Penggunaan listrik (KWh)}}{\text{Luas bangunan (m2)}}$$

*Building Energy Consumption Intensity (IKE)* *Electricity usage (KWh)* *Building area (m2)*

Dari perhitungan IKE per karyawan, tingkat IKE per karyawan di tahun 2024 mencapai 5,01 GJ/orang atau turun dibandingkan tahun sebelumnya sebesar 6,14 GJ/orang. Penurunan ini terutama disebabkan penerapan kebijakan kerja hybrid, serta peningkatan efisiensi operasional yang mengurangi kebutuhan energi per individu. [F.6] [3-3; 302-1; 305-5]

## PENGELOLAAN EMISI

Bank Aladin Syariah melakukan pemantauan emisi dari waktu ke waktu dalam upaya menjaga kualitas pelaporan publik dan penetapan target penurunan emisi gas rumah kaca (GRK). Pada tahun 2024, total emisi yang dihasilkan menunjukkan penurunan dibandingkan tahun sebelumnya sebagai akibat dari pengurangan aktivitas perjalanan dinas yang digantikan dengan pertemuan daring, serta penggunaan transportasi publik sebagai komitmen berkelanjutan. [3-3]

Per 31 Desember 2024, emisi cakupan 1, 2 dan cakupan 3 yang dihasilkan Bank dapat dilihat di bawah ini.

Based on the calculation of IKE per employee, the IKE per employee in 2024 was 5.01 GJ/person, a decrease compared to the previous year, which was 6.14 GJ/person. This decrease was primarily due to the implementation of the hybrid work policy, as well as increased operational efficiency reducing the energy demand per individual.

## EMISSION MANAGEMENT

Bank Aladin Syariah continuously monitors emissions in an effort to maintain the quality of public reporting and set targets for reducing greenhouse gas (GHG) emissions. In 2024, the total emissions produced showed a decrease compared to the previous year, as a result of the reduction in business trip activities replaced by online meetings, as well as the use of public transportation as part of its sustainability commitment. [3-3]

As of December 31, 2024, the emissions from Scope 1, 2, and 3 generated by the Bank are presented below.

## PENGELOLAAN AIR [F.8]

Bank Aladin Syariah menggunakan air untuk keperluan domestik perkantoran, seperti pembilasan di kamar kecil, wudu, mencuci peralatan dapur, dan sebagainya. Air yang digunakan Bank dipasok oleh pihak ketiga, yaitu penyedia gedung Kantor Pusat.

Ketersediaan air bersih yang semakin terbatas, serta proyeksi krisis air bersih, mendorong Bank untuk mengelola penggunaan air dengan sebaik-baiknya. Selain memberikan sosialisasi kepada karyawan tentang pentingnya upaya penghematan sumber daya termasuk air, efisiensi penggunaan air dilakukan melalui inisiatif penyedia gedung dengan menggunakan sensor otomatis untuk membatasi penggunaan air. Namun demikian, pada laporan ini, Bank tidak bisa menyampaikan volume penggunaan air karena termasuk dalam komponen sewa gedung untuk Kantor Pusat.

3. Scope 2 emissions from electricity consumption are calculated based on monthly electricity usage data from PLN, multiplied by the Emission Factor from the Energy and Mineral Resources (ESDM) Ministry for the JAMALI (Java-Madura-Bali) electricity grid.
4. Scope 3 emissions from electricity usage by the data center are calculated using monthly electricity consumption data from vendors, multiplied by the Emission Factor from the Energy and Mineral Resources (ESDM) Ministry for the JAMALI (Java-Madura-Bali) electricity grid.

## WATER MANAGEMENT [F.8]

Bank Aladin Syariah utilizes water for office domestic needs, such as restroom flushing, ablution (wudu), washing kitchen utensils, and other purposes. The Bank's water supply is provided by a third party, specifically the building management of the Head Office

The increasing scarcity of clean water and the projected clean water crisis have driven the Bank to manage water usage efficiently. In addition to educating employees on the importance of resource conservation, including water, efficiency measures have been implemented by the building management through the use of automatic sensors to limit water consumption. However, in this report, the Bank is unable to disclose the volume of water usage as it is included in the rental component of the Head Office building

## PENGELOLAAN SAMPAH/ LIMBAH DOMESTIK

Sejalan dengan implementasi operasional kantor yang ramah lingkungan, Bank Aladin Syariah semaksimal mungkin menerapkan prinsip 3R (Reduce, Reuse and Recycle). Untuk mengurangi limbah plastik kemasan minuman sekali pakai misalnya, Bank mengampanyekan penggunaan botol air minum tumbler yang dibagikan kepada seluruh karyawan sebagai bagian dari starter kit. Untuk mendukung pengelolaan sampah yang optimal, Bank menyediakan tempat sampah dalam jumlah cukup. Bank juga melakukan pemilahan dan pengelolaan limbah operasional yang meliputi sampah organik, anorganik, dan sampah residu dengan menggandeng Rekosistem. Hasil pengelolaan limbah yang dilakukan oleh vendor Bank tersebut dapat dilihat pada tabel di bawah ini.

## DOMESTIC GARBAGE/ WASTE MANAGEMENT

Aligned with its commitment to eco-friendly office operations, Bank Aladin Syariah is dedicated to implementing the 3R principles (Reduce, Reuse, and Recycle) to the fullest extent. For example, to minimize single-use plastic bottle waste, the Bank promotes the use of reusable water bottles (tumblers), which are provided to all employees as part of their starter kit. To support optimal waste management, the Bank ensures the availability of an adequate number of trash bins. Additionally, the Bank carries out waste sorting and operational waste management, covering organic waste, inorganic waste, and residual waste, in collaboration with Rekosistem. The results of the waste management process conducted by the Bank's vendor are presented in the table below.
